ISO 21925-2:2021 (E)

Fire resistance tests — Fire dampers for air distribution systems — Part 2: Intumescent dampers

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principles of the test

5 Apparatus

6 Test construction

- 6.1 General
- 6.1.1 Introduction
- 6.1.2 Side to be tested
- 6.1.3 Dampers installed in both walls and floors
- 6.1.4 Dampers installed within a structural opening
- 6.1.5 Dampers mounted onto face of wall or floor
- 6.1.6 Dampers remote from wall or floor
- 6.1.6.1 Within the furnace
- 6.1.6.2 Outside the furnace
- 6.1.7 Minimum separation between dampers
- 6.2 Size of specimen
- 6.3 Specimen installation
- 6.4 Supporting construction
- 6.4.1 Principles
- 6.4.2 Recommended supporting constructions
- 6.4.2.1 General
- 6.4.2.2 Non-standard supporting constructions
- 6.5 Conditioning

7 Determination of leakage of connecting duct and measuring station

8 Opening and closing cycles

9 Fire test

10 Classification and criteria

- 10.1 General
- 10.2 Number of tests required

11 Test report

12 Direct field of application of the test results

- 12.1 Size of fire damper
- 12.2 Fire dampers installed within structural openings
- 12.3 Fire dampers mounted onto the face of a wall
- 12.4 Fire dampers remote from a wall or floor
- 12.5 Separation between fire dampers and between fire dampers and construction elements
- 12.6 Supporting constructions

Annex A (normative) Durability

A.1 General
A.2 Temperature and controlled humidity exposure
A.2.1 Temperature exposure to 70 °C
A.2.2 Controlled humidity exposure
A.2.3 Ambient temperature exposure
A.3 Acceptance criteria after temperature and controlled humidity exposure

Annex B (informative) Test apparatus

Annex C (informative) Reaction to fire tests — Intumescent materials

C.1 General
C.2 Thermal activation temperature test
C.2.1 General
C.2.2 Apparatus
C.2.3 Test specimens
C.2.4 Test method
C.3 Faulty set-off test
C.3.1 General
C.3.2 Apparatus
C.3.3 Test specimens
C.3.4 Test method
C.3.5 Performance
C.4 Expansion pressure tests
C.4.1 General
C.4.2 Expansion pressure — Disc pressure test method
C.4.2.1 Apparatus
C.4.2.2 Test specimens
C.4.2.3 Test method
C.4.3 Expansion pressure — Pipe pressure test method
C.4.3.1 Apparatus
C.4.3.2 Test specimens
C.4.3.3 Test method
C.4.4 Expansion pressure - Die-set pressure method for covered, skinned or shaped specimens
C.4.5 Test report

Annex D (informative) The use and application of intumescent fire dampers in ducted air distribution systems

D.1 General
D.2 Properties
D.3 Applications
