DIN EN 12101-13:2022-11 (E)

Smoke and heat con trol systems - Part 13: Pressure differential systems (PDS) - Design and calculation methods, installation, acceptance testing, routine testing and maintenance; German Version EN 12101-13:2022

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Design objectives 8
4.1 General 8
4.2 Protection of means of escape 8
4.3 Protection of firefighting routes 8
4.4 Property protection 8
4.5 Additional functions 8

5 Normative requirements 9
5.1 General 9
5.2 Application of Class 1 and Class 2 10
5.3 Response delay - time period definitions 10
5.4 Door opening force 12
5.5 Pressure differential systems 12
5.6 Pressurization systems 14

6 Interaction 29
6.1 General 29
6.2 Requirements 30

7 Equipment and components - specification and installation 31
7.1 General 31
7.2 Software based fire control systems 32
7.3 Automatic control of a PDS 32
7.4 Manual control of a PDS 32
7.5 Description of components and their requirements 34

8 Testing and measuring 43
8.1 General 43
8.2 Preconditions 43
8.3 Tests 44
8.4 Minimum number of tests; floor positions and other information 45
8.5 Test procedures 47

9 Additional considerations for design and testing 54
9.1 General 54
9.2 Parameters for consideration during design and performance testing 54

10 Documentation 55
10.1 General 55

10.2 Requirements by the authorities having jurisdiction 55
10.3 Technical description of the PDS 55
10.4 "As built/installed" information 55
10.5 Controls 56
10.6 Components list (inventory) and datasheets 56
10.7 Completion certification 57

11 Testing and Maintenance, design changes, faults, routine testing and operation 57
11.1 General 57
11.2 Records 57
11.3 Building design changes 58
11.4 Faults 58
11.5 Routine testing 59
11.6 Maintenance 61

Annex A (informative) Calculation procedures 62

Annex B (informative) Design example and possible calculation procedures 81

Annex C (informative) Further information on wind and temperature effects 91

Annex D (informative) Guidance for PDS design for buildings taller than 60 m 94

Annex E (informative) (Example) PDS drawing 99

Annex F (informative) Documentation and responsibilities in the process 100

Annex G (informative) (Example) PDS concept report 103

Annex H (informative) (Example) PDS test report 106

Annex I (informative) Risk assessment - List of potential disturbances 114

Annex J (informative) Practical suggestions for successful commissioning 116

Annex K (normative) Labelling 117

Bibliography 118
