DIN EN 17468-1:2022-09 (E)

Fibre cement products - Determination of pull through and shear resistance and bending strength calculations - Part 1: Flat sheets

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Symbols and abbreviations 6

5 Product requirements 7
5.1 Composition 7
5.2 Appearance and finish 7

6 Sampling procedure 7
6.1 Sampling method 7
6.2 Type testing 8
6.3 Preparation of test specimens 8

7 Test method for the determination of pull through resistance 9
7.1 Principle 9
7.2 Tensile testing machine 9
7.3 Fasteners 12
7.4 Test procedure 12
7.5 Expression of results and test report 12
7.5.1 Pull through resistance 12
7.5.2 Test report 13

8 Test method for the determination of shear resistance 14
8.1 Principle 14
8.2 Test equipment 14
8.3 Fasteners 15
8.4 Test procedure 16
8.5 Expression of results and test report 16
8.5.1 Shear resistance 16
8.5.2 Test report 17

9 Mechanical characteristics 17
9.1 Bending strength 17
9.1.1 General 17
9.1.2 Characteristic bending strength 18
9.1.3 Design bending strength 20
9.2 Design pull through resistance / shear resistance 20
