

ISO/TR 4553:2022-01 (E)

Deformations and displacements of buildings and building elements at serviceability limit states

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Limit state design		1
5 Serviceability limit state guidelines for buildings and building elements		2
6 Design procedure for serviceability limit states		2
7 Probability of exceedance and reliability index for serviceability		3
8 Verification methods for serviceability		4
8.1 General.....		4
8.2 Actions.....		4
8.3 Design values of the effects of actions.....		5
8.4 Combination of actions.....		6
8.4.1 General.....		6
8.4.2 Characteristic combination of actions.....		6
8.4.3 Frequent combination of actions.....		6
8.4.4 Quasi-permanent combination of actions.....		6
8.4.5 Combination of actions in seismic design situations.....		7
8.5 Design values of geometrical parameters.....		7
8.6 Design values of material properties.....		7
9 Criteria for serviceability limit state		8
9.1 General.....		8
9.2 Vertical and horizontal deformations.....		8
9.2.1 General.....		8
9.2.2 Vertical deformations.....		9
9.2.3 Horizontal deformations.....		10
9.2.4 Concrete buildings — Stress limitation and checking of cracks.....		11
9.3 Vibration.....		11
Bibliography		12
