

DIN EN 14437:2023-08 (E)

Determination of the uplift resistance of installed clay or concrete tiles for roofing - Roof system test method

Contents		Page
European foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Symbols and abbreviations	6
5	Sampling	6
6	Test conditions	6
7	Test material	6
8	Apparatus	6
8.1	Test rig	6
8.2	Cables	7
8.3	Force measuring device	7
8.4	Monitoring device for displacement of the roofing tiles	7
8.5	Measuring device for weight	7
9	Test procedure	7
9.1	Measurement of the weight	7
9.2	Installation of battens, roofing tiles and fixings	7
9.3	Determination of the location of the forces on the test roof	8
9.4	Measurement of the uplift resistance	9
9.4.1	Calibration of the test equipment	9
9.4.2	Eliminate the effect of the load bars and cables	9
9.4.3	Trial test	9
9.4.4	Test series	9
9.4.5	Application of the force	9
9.4.6	Determining the maximum uplift resistance	10
10	Test report	11
Annex A (informative) Example of test rig		13
Annex B (normative) Specification of the arrangements of the tiles on the test rig and the arrangement of the tiles to be loaded		14
Annex C (informative) Examples of fixing patterns to be tested		17
Annex D (informative) Calculation of uplift resistance		23
Annex E (informative) Calculation of the uplift resistance of clay or concrete tiles for roofing at various roof pitches, for a tested configuration		28
Annex F (informative) Example of roof tiles for which the test method is not applicable		32
Annex G (informative) Test rig commissioning and periodic calibrations		33
