## Floor screeds in building construction - Part 2: Floor screeds and heating floor screeds on insulation layers

---

| <b>Contents</b>                                      | <b>Page</b> |
|--|-------------|
| Foreword .....                                       | 3           |
| 1 Scope .....  | 5           |
| 2 Normative references .....                         | 5           |
| 3 Terms and definitions.....                         | 6           |
| 4 Requirements .....                                 | 6           |
| 4.1 General .....                                    | 6           |
| 4.2 Thickness and strength or hardness classes ..... | 8           |
| 4.2.1 Unheated screeds .....                         | 8           |
| 4.2.2 Heated screeds.....                            | 9           |
| 4.3 Insulating layers .....                          | 9           |
| 5 Structural requirements .....                      | 10          |
| 5.1 Base.....  | 10          |
| 5.2 Levelling layer for installation level .....     | 10          |
| 5.3 Rising elements.....                             | 12          |
| 5.4 Heated screeds.....                              | 12          |
| 6 Workmanship.....                                   | 13          |
| 6.1 Insulating layer .....                           | 13          |
| 6.1.1 Laying.....                                    | 13          |
| 6.1.2 Membrane.....                                  | 13          |
| 6.1.3 Protective measures.....                       | 13          |
| 6.2 Perimeter isolating strips.....                  | 13          |
| 6.3 Screed.....                                      | 14          |
| 6.3.1 General .....                                  | 14          |
| 6.3.2 Reinforcement.....                             | 14          |
| 6.3.3 Screed joints.....                             | 14          |
| 7 Testing .....                                      | 15          |
| 7.1 Initial type testing and production control..... | 15          |
| 7.2 Confirmation testing .....                       | 15          |
| 7.2.1 General .....                                  | 15          |
| 7.2.2 Thickness .....                                | 15          |
| 7.2.3 Flexural strength .....                        | 16          |
| 7.2.4 Hardness .....                                 | 17          |
| 7.2.5 Surface hardness .....                         | 17          |
| 8 Designation .....                                  | 17          |
| Bibliography .....                                   | 18          |

### Figures

|  |    |
|--|----|
| Figure 1 — Types of heated screed .....  | 7  |
| Figure 2 — Levelling with insulation boards for installations with different installation heights..... | 12 |

### Tables

|  |   |
|--|---|
| Table 1 — Nominal thicknesses and flexural strength of unheated screed on an insulating layer for various vertical imposed loads ..... | 8 |
|--|---|
