ISO 24057:2022-11 (E)

Geotechnics - Array measurement of microtremors to estimate shear wave velocity profile

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms, definitions, symbols and abbreviated terms 1
3.1 Terms and definitions 1
3.2 Symbols and abbreviated terms 2

4 Equipment 3
4.1 General 3
4.2 Sensor 3
4.3 Time calibration equipment 4
4.4 Data logger 4
4.5 Distance and location measuring instrument 4
4.6 Protective products 4

5 Survey procedure 5
5.1 General 5
5.2 Preparation 6
5.2.1 Desk study 6
5.2.2 Array design 6
5.3 Field observation 6
5.3.1 Huddle test 6
5.3.2 Setting of sensors 7
5.3.3 Recording 7
5.4 Data organization after field observation 8
5.4.1 Quality control of the microtremor record 8
5.4.2 Data storage 8

6 Data Analysis 8
6.1 Data organization after field observation 8
6.2 Phase velocity analysis 8
6.3 Inversion analysis to S-wave velocity profile 10
6.4 Uncertainty of phase velocity and S-wave velocity profile 10

7 Reporting 11
7.1 General 11
7.2 Field report 11
7.3 Analysis report 13

Annex A (informative) Example of a figure and a table schematic figure of array measurement of microtremors 15

Annex B (informative) Example of microtremor records and analysis results 16

Annex C (normative) Array design 18

Annex D (informative) Frequency characteristics of sensors in huddle test 22

Annex E (informative) Examples of good and poor quality microtremor records 23

Annex F (informative) Methods for phase velocity analysis 25

Annex G (informative) Method for inversion analysis to S-wave velocity profile 32

Annex H (informative) Uncertainty 34

Bibliography 38
