Foreword ... 3

NA.1 Scope ... 4
NA.2 National provisions ... 4
NA.2.1 General ... 4
NA.2.2 National provisions ... 4
NDP re 1.1(4) Scope ... 4
NCI re 1.1 Scope ... 4
NCI re 1.2.1 General reference standards ... 5
NDP re 3.1(3) Strength parameters ... 5
NDP re 4.1.4(11)P Potentially liquefiable soils ... 5
NCI re 4.2.2(1)P Determination of the ground type for the definition of the seismic action ... 5
NDP re 5.2(2)P c) Rules for conceptual design ... 5
NCI re 5.4.1.2(2) Foundation horizontal connections ... 5

Annex NA.G (normative) Simplified design rules for foundations of simple structures and simple retaining structures ... 6
NA.G.1 General ... 6
NA.G.2 Soil investigations ... 6
NA.G.3 Structural strength verification ... 6

Annex NA.H (normative) Simplified verification against soil liquefaction ... 7

Annex NA.I (normative) Verification of the seismic bearing capacity of shallow foundations ... 9

Figures

Figure NA.H.1 — Minimum values of the peak pressure of the pressure probe as a function of acceleration according to DIN EN 1998-1/NA:2023-11, Equation (NA.1): (a) FC = 0 %, (b) FC = 15 %, (c) FC = 35 % ... 8
