DIN EN 17891:2023-12 (E)

Conservation of cultural heritage - Desalination of porous inorganic materials by poultices

Contents

Page

European foreword 4

Introduction 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Symbols and abbreviations 9

5 Principles of poultices desalination 9
5.1 General 9
5.2 Advection-based poulticing methods 10
5.3 Diffusion-based poulticing methods 10

6 Test equipment 11

7 Methodology for the determination of the operational parameters 11
7.1 General 11
7.2 Selection of the poultice/s component/s 11
7.3 Poultice formulation and required properties 12
7.4 Poultice preparation by water addition 12
7.5 Trial evaluation of harmfulness and effectiveness 13
7.5.1 General 13
7.5.2 Measuring the amount of ions transferred from the substrate to the poultices 13
7.5.3 Measuring the ion content in the substrate before and after desalination 14

8 Desalination process 14
8.1 Environmental conditions of application 14
8.2 Preparation of the substrate 14
8.3 Poultice application 14
8.3.1 General 14
8.3.2 Thickness of poultice 15
8.3.3 Time of application 15
8.3.4 Removal of the poultice 15
8.4 Number of applications 15

9 Test report 16

Annex A (informative) Desalination poultices 17

A.1 Clay materials 17
A.2 Cellulosic and wooden materials 17
A.3 Gelling materials aqueous, non-aqueous, and mixed gels 17

Annex B (informative) Advection and diffusion process 19

B.1 Advection 19
B.2 Diffusion 20

Annex C (informative) Workability and consistency: flow test (EN 459-2) Cone penetration (EN 413-2) of poultices 21

Annex D (informative) Identification of salt species or ions according to EN 16455 22

Annex E (informative) Number of applications 23

E.1 General 23
E.2 Trial test removing ions from a brick wall masonry 23
E.3 Trial test: case study on a mural painting surface 24
