

DIN EN 1990/NA/A1:2024-05 (E)

National Annex - Nationally determined parameters - Eurocode: Basis of structural design; Amendment A1

Contents

Page

Foreword	3
1 Amendment to NA.1 Scope	4
2 Amendment to NA.2.1 General.....	4
3 Amendment to NA.2.2 National provisions.....	7
4 Amendment to Annex A2	8
5 Addition of an NCI re “Basic requirements for bearing systems for bridges” as Annex NA.E	15
NA.E.1 General	15
NA.E.2 Basis of design.....	15
NA.E.3 Construction documents.....	16
NA.E.4 Actions	21
NA.E.5 Design values of movements and bearing forces.....	23
NA.E.6 Supplementary information for the design of bearings	28
6 Inclusion of the Bibliography	30

Tables

Table NA.A2.1	9
Table NA.A2.8.1 — Conditions for the first natural frequency in bending f_h of single-track steel decks.....	14
Table NA.A2.8.2 — Lower limits of L_0 for horizontal spans.....	14
Table NA.E.1 — Typical bearing schedule for the characteristic values of individual actions	18
Table NA.E.2 — Typical bearing schedule for the design values of bearing forces and movements for the ultimate and serviceability limit states.....	20
Table NA.E.3 — Characteristic values of actions in the final state	22
Table NA.E.5 — Recommended values of ΔT_0	25
