

ISO 9869-3:2023-11 (E)

Thermal insulation of building elements - In-situ measurement of thermal resistance and thermal transmittance - Part 3: Probe insertion method

Contents		Page
Foreword.....		iv
Introduction.....		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols and units	2
5	Principle	2
	5.1 General.....	2
	5.2 Method without heat flow measurement.....	2
	5.3 Method with heat flow measurement.....	2
6	Apparatus	3
	6.1 Temperature measuring devices.....	3
	6.1.1 Type of sensors and accuracy.....	3
	6.1.2 Sensor for measuring temperature distribution in walls.....	3
	6.1.3 Sensors for measuring surface and air temperatures.....	4
	6.2 Borescope.....	4
	6.3 Heat flow meter (HFM).....	5
7	Locations of the measured area and sensor installation	5
8	Measurement conditions and period	7
	8.1 General.....	7
	8.2 Method without heat flow measurement.....	7
	8.3 Method with heat flow measurement.....	7
9	Measurement procedure	7
	9.1 General.....	7
	9.2 Method without heat flow measurement.....	7
	9.3 Method with heat flow measurement.....	8
10	Calculations	9
	10.1 Thickness of wall components.....	9
	10.2 Temperature distribution.....	9
	10.3 Thermal resistance.....	9
11	Test report	10
Annex A (normative)	Evaluation of the effect of thermal bridges on the sensor for measuring the temperature distribution in the wall	12
Annex B (informative)	Uncertainty analysis	18
