

# DIN EN 15941:2024-10 (E)

## Sustainability of construction works - Data quality for environmental assessment of products and construction work - Selection and use of data

---

| <b>Contents</b>         |   | <b>Page</b> |
|-------------------------|---|-------------|
| European foreword ..... |   | 6           |
| <b>1</b>                | <b>Scope .....</b>  | <b>7</b>    |
| <b>2</b>                | <b>Normative references .....</b>   | <b>7</b>    |
| <b>3</b>                | <b>Terms and definitions .....</b>  | <b>8</b>    |
| <b>4</b>                | <b>Abbreviations .....</b>  | <b>10</b>   |
| <b>5</b>                | <b>Types of data at product, building and construction works level .....</b>            | <b>10</b>   |
| 5.1                     | General .....   | 10          |
| 5.2                     | Sources of generic data for use at product, building and construction works level ..... | 11          |
| 5.3                     | Examples of data and their uses at building and construction works level .....          | 11          |
| 5.4                     | Types of EPD .....  | 14          |
| <b>6</b>                | <b>Data quality criteria and aspects for products and construction works .....</b>      | <b>17</b>   |
| 6.1                     | General .....   | 17          |
| 6.2                     | International Reference Life Cycle Data System data .....                               | 17          |
| 6.3                     | Time-related coverage .....   | 17          |
| 6.3.1                   | General .....   | 17          |
| 6.3.2                   | General time related criteria .....   | 18          |
| 6.3.3                   | Time-related criteria for construction products and buildings .....                     | 18          |
| 6.3.4                   | Time related meta-data for ILCD data sets .....   | 19          |
| 6.4                     | Geographical coverage .....   | 20          |
| 6.4.1                   | General geography related criteria .....  | 20          |
| 6.4.2                   | Geography related criteria for construction products and buildings .....                | 21          |
| 6.4.3                   | Geography related meta-data for ILCD data sets .....                                    | 21          |
| 6.5                     | Technological coverage .....  | 22          |
| 6.5.1                   | General .....   | 22          |
| 6.5.2                   | Technology-related criteria at product level .....                                      | 22          |
| 6.5.3                   | Technology related criteria for data quality at building level .....                    | 22          |
| 6.5.4                   | Technology related meta-data for ILCD data sets .....                                   | 23          |
| 6.6                     | Aspect of Precision .....   | 24          |
| 6.6.1                   | General .....   | 24          |
| 6.6.2                   | Precision related meta-data for ILCD data sets .....                                    | 25          |
| 6.7                     | Aspect of Completeness .....  | 25          |
| 6.7.1                   | General .....   | 25          |
| 6.7.2                   | Aspect of Completeness at product level .....   | 26          |
| 6.7.3                   | Aspect of Completeness at building level .....  | 26          |
| 6.7.4                   | Completeness related meta-data for ILCD data sets .....                                 | 27          |
| 6.8                     | Aspect of Consistency .....   | 27          |
| 6.8.1                   | General .....   | 27          |
| 6.8.2                   | Consistency related meta-data for ILCD data sets .....                                  | 28          |
| 6.9                     | Sources of the data .....   | 30          |
| 6.10                    | Meta-data for ILCD data sets related to Sources of data .....                           | 30          |
| <b>7</b>                | <b>Data Quality at Product level .....</b>  | <b>31</b>   |
| 7.1                     | Assessing Data Quality at product level .....   | 31          |
| 7.1.1                   | General .....   | 31          |
| 7.1.2                   | Relevant data .....   | 31          |

|  |  |           |
|--|--|-----------|
| 7.1.3  | Assessing data quality of average or specific data .....                                     | 32        |
| 7.1.4  | Assessing data quality of generic data .....   | 33        |
| 7.1.5  | Assessing data quality of the final EPD .....  | 33        |
| 7.2  | Selecting and Collecting data at product level .....   | 33        |
| 7.2.1  | General .....  | 33        |
| 7.2.2  | Selecting raw data .....   | 34        |
| 7.2.3  | Selection of specific and generic data .....   | 36        |
| 7.3  | Reporting data quality at Product Level .....  | 39        |
| 7.3.1  | General .....  | 39        |
| 7.3.2  | Reporting data quality in the project report .....   | 39        |
| 7.3.3  | Reporting data quality in the EPD .....  | 40        |
| 7.3.4  | Other data quality information in the EPD .....  | 42        |
| 7.3.5  | Providing the EPD in ILCD format .....   | 42        |
| 8  | Data quality at building level .....   | 42        |
| 8.1  | General .....  | 42        |
| 8.2  | Assessment during specific design and decision steps/stages .....                            | 43        |
| 8.3  | Assessing data quality at building level .....   | 43        |
| 8.3.1  | General .....  | 43        |
| 8.3.2  | Time related .....   | 44        |
| 8.3.3  | Geography related .....  | 44        |
| 8.3.4  | Technology Related .....   | 44        |
| 8.3.5  | Completeness .....   | 45        |
| 8.3.6  | Consistency .....  | 47        |
| 8.3.7  | Plausibility .....   | 48        |
| 8.3.8  | Precision .....  | 48        |
| 8.4  | Selection of quantity data, environmental data and other information .....                   | 48        |
| 8.4.1  | General .....  | 48        |
| 8.4.2  | Selecting data to describe the building .....  | 48        |
| 8.4.3  | Selecting of quantity data for the building assessment .....                                 | 49        |
| 8.4.4  | Selecting of environmental data for products and processes for the building assessment ..... | 50        |
| 8.5  | Data quality of the assessment results of the building's environmental performance .....     | 53        |
| 8.5.1  | General .....  | 53        |
| 8.5.2  | Data quality evaluation of quantification .....  | 53        |
| 8.5.3  | Data quality evaluation during Type 1 and Type 2 Assessments .....                           | 54        |
| 8.5.4  | Data quality evaluation during Type 2, Type 3 and Type 4 assessments .....                   | 54        |
| 8.5.5  | Summarizing data quality .....   | 55        |
| 8.6  | Databases, data set providers and tools .....  | 56        |
| 8.7  | Reporting data quality generally at building level .....                                     | 56        |
| 8.8  | Verification and review .....  | 59        |
| 9  | Data quality at civil engineering works level .....  | 59        |
| <b>Annex A (informative) Overview of definitions used in this document and those in EN 15804 and PEF and Level(s) .....</b>                          |  | <b>60</b> |
| A.1  | Overview of definitions .....  | 60        |
| A.2  | Foreground and background data .....   | 65        |
| A.3  | Raw data .....   | 65        |
| A.4  | Specific and generic data .....  | 65        |
| <b>Annex B (informative) Mass Balance at product level .....</b>   |  | <b>66</b> |
| <b>Annex C (informative) Examples of reporting data quality in EPD .....</b>   |  | <b>69</b> |
| <b>Annex D (informative) Examples of the use of a data selection at building level depending on goal and scope and data quality assessment .....</b> |  | <b>71</b> |
| D.1  | General .....  | 71        |
| D.2  | Early-stage design - no materials chosen .....   | 71        |
| D.3  | Early-stage design - Some materials chosen .....   | 72        |

|   |  |    |
|---|--|----|
| D.4   | Detailed Design Stage - Cladding comparison .....  | 73 |
| D.5   | Building Assessment for planning or regulatory purposes .....  | 74 |
| D.6   | Building Completion - As built assessment .....  | 74 |
| Annex E (normative) Avoiding double counting in the selection of specific and generic data for energy at product and building level ..... |  | 75 |
| E.1   | General .....  | 75 |
| E.1.1   | General guidance .....   | 75 |
| E.1.2   | Overarching requirements for avoiding double counting in the selection of specific and generic data for energy at product and building level ..... | 75 |
| E.1.2.1   | Avoiding double counting .....   | 75 |
| Ensuring transparency .....   |  | 75 |
| Use of Contractual instruments .....  |  | 75 |
| E.2   | Avoiding double counting in the selection of specific and generic data for energy at product and building level .....                              | 75 |
| E.2.1   | Overarching Principles .....   | 75 |
| E.2.1.1   | General .....  | 75 |
| E.2.1.2   | Requirements for contractual instruments .....   | 76 |
| E.2.1.3   | Requirement for residual mix .....   | 77 |
| E.2.1.4   | Recommendation for consistent use of contractual instruments and residual mix .....  | 78 |
| E.2.2   | Product level Electricity - modelling foreground, upstream and downstream processes within control of the manufacturer(s) .....                    | 78 |
| E.2.2.1   | General .....  | 78 |
| E.2.2.2   | Electricity from the grid .....  | 78 |
| E.2.2.3   | Electricity from a directly connected supplier .....   | 78 |
| E.2.2.4   | Internally generated electricity .....   | 79 |
| E.2.2.5   | Requirement for modelling of electricity with contractual instruments .....  | 79 |
| E.2.2.6   | Requirement for transparency .....   | 79 |
| E.2.3   | Product level Biogas and the gas network - modelling foreground, upstream and downstream data within the control of the manufacturer(s) .....      | 79 |
| E.2.3.1   | General .....  | 79 |
| E.2.3.2   | Biogas from the gas network .....  | 79 |
| E.2.3.3   | Biogas from a directly connected supplier .....  | 79 |
| E.2.3.4   | Internally generated biogas .....  | 80 |
| E.2.3.5   | Requirement for modelling of biogas with contractual instruments .....   | 81 |
| E.2.3.6   | Requirement for transparency .....   | 81 |
| E.2.4   | Product level - Other energy - modelling foreground, upstream and downstream data in the control of the manufacturer(s) .....                      | 81 |
| E.2.4.1   | General .....  | 81 |
| E.2.4.2   | Requirement for modelling of other energy with contractual instruments .....   | 81 |
| E.2.4.3   | Requirement for transparency .....   | 81 |
| E.2.5   | Product level - Energy - modelling upstream data (A1-A3) not in the control of the manufacturer(s) .....   | 81 |
| E.2.6   | Product Level Energy - modelling downstream data (A4-C4 and Module D) .....  | 81 |
| E.2.7   | Building Level Energy - modelling energy use in the building in the Construction Stage, Use Stage, End-of-life stage and Module D2 .....           | 82 |
| E.2.8   | Transparency .....   | 82 |
| E.2.8.1   | Reporting at product level in the Project Report .....   | 82 |
| E.2.8.2   | Reporting in EPD .....   | 83 |
| E.2.8.3   | Reporting at Building Level in the Project Report .....  | 83 |
| E.2.8.4   | Reporting in Building Level Communication .....  | 83 |
| Annex F (informative) Data quality scheme for building level based on Level(s) .....  |  | 84 |
| Bibliography .....  |  | 85 |
