

# DIN EN 1993-1-13:2025-04 (E)

## Eurocode 3 - Design of steel structures - Part 1-13: Beams with large web openings

<b>Contents</b>		<b>Page</b>
	European foreword .....	4
0	Introduction .....	5
1	Scope .....	8
2	Normative references .....	10
3	Terms, definitions and symbols .....	11
3.1	Terms and definitions .....	11
3.2	List of symbols .....	12
4	Basis of design .....	17
4.1	General .....	17
4.2	Verifications .....	17
4.3	Methods of design for Vierendeel bending .....	18
4.3.1	Equivalent rectangular opening method .....	18
4.3.2	Alternative methods .....	18
4.4	Tolerances and manufacture .....	18
5	Materials .....	18
5.1	General .....	18
5.2	Welding .....	18
6	Durability .....	19
7	Structural Analysis .....	19
7.1	Methods of analysis .....	19
7.2	Member stiffness for global structural analysis .....	19
7.3	Serviceability .....	21
7.4	Classification for global bending .....	21
7.5	Section classification of Tees subject to Vierendeel bending .....	21
7.6	Section classification of longitudinal stiffeners .....	22
8	Ultimate Limit States .....	22
8.1	General Requirements for all openings .....	22
8.1.1	General .....	22
8.1.2	Geometric limits for unstiffened web openings .....	23
8.1.3	Geometric limits for web openings with stiffeners .....	23
8.2	Shear resistance at web opening positions .....	24
8.3	Bending resistance of a beam with web openings .....	25
8.3.1	General .....	25
8.3.2	Buckling resistance of the compressed Tee for long openings .....	25
8.4	Resistance of the Tee sections in Vierendeel bending .....	26
8.5	Web buckling next to widely spaced openings .....	28
8.5.1	General .....	28
8.5.2	Web buckling .....	29
8.6	Rules for closely spaced openings .....	30
8.6.1	General .....	30
8.6.2	Web-post bending .....	30
8.6.3	Web-post buckling .....	32
8.6.4	Web-post shear .....	33

8.7	Longitudinally stiffened openings .....	34
8.7.1	Scope of the rules for openings with longitudinal stiffeners .....	34
8.7.2	Additional verifications for stiffened openings .....	34
8.7.3	Global bending resistance for stiffened openings .....	34
8.7.4	Vierendeel bending resistance for stiffened openings .....	35
8.7.5	Web buckling for widely spaced stiffened openings .....	35
8.7.6	Web-post buckling for closely spaced stiffened openings .....	35
8.7.7	Openings with transverse stiffeners .....	36
8.8	Additional requirements for other cases .....	36
8.8.1	End-posts .....	36
8.8.2	Loads applied over or close to the openings .....	38
8.9	Alternative method for Vierendeel bending for circular openings .....	39
8.10	Alternative method for stability of web-post between circular openings .....	40
8.11	Alternative method for sinusoidal openings .....	43
8.11.1	General .....	43
8.11.2	Vierendeel bending .....	43
8.12	Lateral torsional buckling .....	44
9	Serviceability limit states .....	45
	Bibliography .....	47
