DIN 18008-5:2024-12 (E)

Glass in Building - Design and construction rules - Part 5: Additional requirements for walk-on glazing

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions, symbols and units 4
3.1 Terms and definitions 4
3.2 Symbols and units 5

4 Construction products 5

5 Application conditions 5

6 Effects of actions and verification 5
6.1 Limit states for static loads 5
6.2 Limit states for impact actions and residual load-bearing capacity 6

Annex A (normative) Verification of impact resistance and residual load-bearing capacity by building component tests 7

A.1 General 7
A.2 Test procedure 7
A.2.1 Verification of impact resistance 7
A.2.2 Verification of residual load-bearing capacity 8
A.2.3 Test report 8

Annex B (normative) Glass constructions with empirically verified impact resistance and residual load-bearing capacity 10

B.1 General 10
B.2 Glazing units linearly supported on all sides 10

Bibliography 12
