DIN EN 1996-1-2:2026-11 (E)

Eurocode 6 - Design of masonry structures - Part 1-2: Structural fire design

Contents

Page

European foreword 4

0 Introduction 5

1 Scope 7
1.2 Assumptions 7

2 Normative references 7

3 Terms, definitions and symbols 8
3.1 Terms and definitions 8
3.1.1 Terms relating to fire design in general 8
3.1.2 Special terms relating to calculation methods 9
3.2 Symbols 9

4 Basis of design 11
4.1 General 11
4.2 Nominal fire exposure 11
4.3 Physically based fire exposure 12
4.4 Actions 12
4.5 Design values of material properties 12
4.6 Verification methods 13
4.7 Member analysis 13

5 Material properties 14
5.1 General 14
5.2 Thermal properties 14
5.2.1 Emissivity coefficient 14
5.2.2 Thermal conductivity 14
5.2.3 Specific heat 14
5.2.4 Specific weight 14
5.3 Mechanical properties 14
5.3.1 Mechanical properties of masonry at normal temperature 14
5.3.2 Mechanical properties of masonry at elevated temperature 14

6 Tabulated design data 15
6.1 General 15
6.2 Walls 15
6.2.1 General 15
6.2.2 Cavity walls and untied walls comprising independent leaves 15
6.2.3 Surface finishes 17
6.2.4 Additional requirements 17

7 Detailing 17
7.1 General 17
7.2 Junctions and joints 17
7.3 Fixtures, pipes and cables 18
7.4 Execution of head joints 18

Annex A (normative) Tabulated fire resistance of masonry walls 19

A.1 Use of this annex 19

A.2 Scope and field of application 19
A.3 General 19
A.4 Clay masonry 20
A.5 Calcium silicate masonry 33
A.6 Dense and lightweight aggregate concrete masonry 40
A.7 Autoclaved aerated concrete masonry 52
A.8 Manufactured stone masonry 57

Annex B (informative) Input parameters for calculation models 59

B.1 Use of this informative annex 59
B.2 Scope and field of application 59
B.3 Thermal and physical properties of masonry as a function of temperature 59
B.4 Mechanical properties 64
B.4.1 General 64
B.4.2 Mechanical properties as functions of temperature for calculations 65

Annex C (informative) Examples of connections that meet the requirements for detailing75 C.1 Use of this informative annex 75

C.2 Scope and field of application 75
C.3 Examples 75
