DIN EN 1366-3:2025-08 (E)

Fire resistance tests for service installations - Part 3: Penetration seals (includes Amendment A1:2024)

Contents

Page

European foreword 4

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions, symbols, units and abbreviations 9
3.1 Terms and definitions 9
3.2 Symbols, units and abbreviations 19
3.2.1 Symbols 19
3.2.2 Units 19
3.2.3 Abbreviations 19

4 Test equipment 20

5 Test conditions 20
5.1 Heating conditions 20
5.2 Pressure conditions 20

6 Test specimen 21
6.1 Size and distances 21
6.2 Number 23
6.3 Design 24
6.3.1 General 24
6.3.2 Advice for designing test specimen(s) without standard configuration 24
6.4 Construction 25
6.5 Verification 25

7 Installation of test specimen 25
7.1 General 25
7.2 Installation of the supporting construction including penetration(s) 25
7.2.1 General 25
7.2.2 Standard supporting constructions 25
7.3 Installation of service(s) 30
7.3.1 General 30
7.3.2 Support conditions for penetrating services 30
7.3.3 Ballast weights on cable carriers in standard configurations 31
7.3.4 Pipe end configuration 36
7.3.5 Cable / bus bar trunking units / waveguide end configuration 37
7.3.6 Subsequent addition/removal of services 37
7.4 Installation of the penetration seal 37

8 Conditioning 38

9 Application of instrumentation 38
9.1 Thermocouples 38
9.1.1 Furnace thermocouples (plate thermometers) 38
9.1.2 Unexposed face thermocouples 38
9.1.3 Roving thermocouple 45

9.2 Pressure 46

10 Test procedure 46
10.1 General 46
10.2 Integrity 46
10.3 Other observations 46

11 Performance criteria 46
11.1 Integrity 46
11.2 Insulation 46
11.3 Multiple service penetration seals and mixed penetration seals 47
11.4 Several penetrations in a test construction 47

12 Test report 47

13 Field of direct application of test results 48
13.1 General 48
13.2 Orientation 48
13.3 Supporting construction 48
13.3.1 Rigid floor and wall constructions 48
13.3.2 Double-sided flexible wall constructions 48
13.3.3 One-sided flexible wall constructions 52
13.3.4 Cross laminated timber walls 53
13.3.5 Cross-laminated timber floors 53
13.4 Services 54
13.5 Service support construction 54
13.6 Penetration seal size 54
13.7 Distances 55

Annex A (normative) Configuration and field of direct application for cable penetration seals 57

Annex B (normative) Special penetration seal systems 75

Annex C (normative) Test configuration and field of direct application for conduits and trunkings for cables 85

Annex D (normative) Test specimen design and field of direct application for bus bars / bus bar trunking units 99

Annex E (normative) Test specimen design, test procedure and field of direct application for pipe penetration seals 103

Annex F (normative) Test specimen design, test procedure and field of direct application for mixed penetration seals 143

Annex G (normative) Critical service approach 152

Annex H (informative) Explanatory notes 157
