Environmental management for concrete and concrete structures - Part 5: Execution of concrete structures

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 2

5 Principles and procedure for environmental management related to execution of concrete structures 2
5.1 Principles 2
5.2 Procedure 3
5.3 Confirmation of the client brief and design documents and specifications 4
5.4 Setting of the environmental performance requirements 5
5.4.1 Selection of impact categories 5
5.4.2 Setting of indicators 5
5.4.3 Setting of environmental performance requirements for indicators 5
5.5 Formulation of the construction plan 6
5.6 Estimation 6
5.7 Verification 6
5.8 Execution of construction and related works 7
5.9 Inspection 7
5.10 Documentation 7

Annex A (informative) Example of indicators for the environmental management 8

Annex B (informative) Examples of the methods of environmental consideration in execution 12

Annex C (informative) Example of environmental management of concreting works - Migration of energy source for concrete pumps- 16
