Environmental management for concrete and concrete structures - Part 5: Execution of concrete structures

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols	2
5	Principles and procedure for environmental management related to execution of concrete structures	2
5.1	Principles	2
5.2	Procedure	3
5.3	Confirmation of the client brief and design documents and specifications	4
5.4	Setting of the environmental performance requirements	5
5.4.1	Selection of impact categories	5
5.4.2	Setting of indicators	5
5.4.3	Setting of environmental performance requirements for indicators	5
5.5	Formulation of the construction plan	6
5.6	Estimation	6
5.7	Verification	6
5.8	Execution of construction and related works	7
5.9	Inspection	7
5.10	Documentation	7
	Annex A (informative) Example of indicators for the environmental management	8
	Annex B (informative) Examples of the methods of environmental consideration in execution	12
	Annex C (informative) Example of environmental management of concreting works - Migration of energy source for concrete pumps-	16
