ISO 23693-2:2026-03 (E)

Determination of the resistance to gas explosions of passive fire protection materials - Part 2: Divisional substrates

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Types of pressure loading from explosions 2

5 Generation of pressure loading 2

6 Test specimens 2
6.1 General 2
6.2 PFP test panels 2
6.3 Representative specimens 3

7 Environmental conditions 4

8 Instrumentation 4

9 Test specification 4

10 Data analysis 5
10.1 Overpressure data analysis 5
10.2 Panel response -- PFP test panels 5
10.2.1 Elastic response -- maximum displacement 5
10.2.2 Plastic response -- support rotation 5

11 Specimen rating 5
11.1 PFP test panel 5
11.2 Representative specimen 6

12 Validity of test 6
12.1 General 6
12.2 Tests with PFP test panels 6
12.3 Tests with representative samples 6

13 Test report 6

Annex A (informative) Calculation of pressure build-up in supporting construction 8

Annex B (informative) Calculation of maximum dynamic displacement from measured permanent displacement 10

Annex C (normative) Description of damage to PFP 12
