

DIN EN ISO 19101:2005-05 (E)

Geographic information - Reference model (ISO 19101:2002); English version EN ISO 19101:2005

Contents

Foreword.....	4
Introduction.....	5
1 Scope	6
2 Conformance.....	6
3 Normative references	6
4 Terms and definitions	6
5 Symbols and abbreviated terms	9
5.1 Abbreviations	9
5.2 UML notation.....	10
6 Concepts and organization of the reference model.....	10
6.1 Integration of geographic information with information technology.....	10
6.2 Focus of standardization in the ISO 19100 series of geographic information standards	12
6.3 Reference model organization	12
6.4 Interoperability of geographic information.....	13
6.4.1 Definition of interoperability	13
6.4.2 Aspects of interoperability	14
6.4.3 Interoperability in the ISO 19100 series of geographic standards	14
7 Conceptual modelling	15
7.1 Content of this clause	15
7.2 Definition of conceptual modelling.....	15
7.3 Use of this clause	16
7.4 Specification of conceptual schema language for the ISO 19100 series of geographic information standards.....	16
7.5 The approach to conceptual modelling.....	16
7.6 Principles of conceptual modelling	17
7.7 Model integration	18
8 The Domain reference model	18
8.1 Content of this clause	18
8.2 Definition of Domain reference model.....	18
8.3 Uses of the Domain reference model	19
8.4 Overview of the Domain Reference model	19
8.5 Use of abstraction levels in the Domain reference model	21
8.6 Detailed description of the Domain reference model	22
8.6.1 Introduction	22
8.6.2 Application schema.....	22
8.6.3 Spatial objects and position	24
8.6.4 Reference systems	25
8.6.5 Quality.....	27
8.6.6 Metadata	28
8.6.7 General feature model.....	29
9 The Architectural reference model	30
9.1 Content of this clause	30
9.2 Definition of the Architectural reference model	31
9.3 Uses of the Architectural reference model	31
9.4 Overview of the Architectural reference model	31
9.4.1 Introduction	31
9.4.2 Services and service interfaces	31
9.4.3 Identifying services and service interfaces for geographic information.....	33

9.5	Types of geographic information services	33
9.5.1	Introduction	33
9.5.2	Types of information technology services relevant to geographic information.....	33
9.5.3	Extension of service types for geographic information	35
9.5.4	Service types in the ISO 19100 series compared to other service models	35
9.6	Service interfaces and standardization requirements	35
9.6.1	Introduction	35
9.6.2	Identifying standardization requirements for geographic information services	36
9.6.3	Fulfilling standardization requirements and the role of profiles	37
9.6.4	Elaboration of standardization requirements	37
9.6.5	Using this procedure to identify requirements for geographic information standards	38
10	Profiles and functional standards	39
10.1	Content of this clause	39
10.2	Profiles and base standards	39
10.3	Modularity concept	39
10.4	Use of profiles	39
10.5	Product specifications	39
10.6	Relationship of profiles to base standards	39
10.7	Functional standards	40
10.8	Registration of profiles	40
Annex A (informative) The Conceptual Schema Modelling Facility		41
A.1	Introduction	41
A.2	The ISO Conceptual Schema Modelling Facility Schema architecture	41
A.3	ISO CSMF schema architecture and the ISO 19100 series of geographic information standards	43
Annex B (informative) Focus of standardization in the ISO 19100 series of geographic information standards		44
Bibliography		46
