

# DIN EN 1990/A1:2006-04 (E)

## Eurocode: Basis of structural design

---

<b>Contents</b>	<b>Page</b>
<b>FOREWORD</b> .....	<b>3</b>
<b>ANNEX A2</b> .....	<b>4</b>
<b>National Annex for EN 1990 Annex A2</b> .....	<b>4</b>
<b>A2.1 FIELD OF APPLICATION</b> .....	<b>6</b>
A2.1.1 General .....	6
A2.1.2 Symbols .....	6
<b>A2.2 COMBINATIONS OF ACTIONS</b> .....	<b>7</b>
A2.2.1 General .....	7
A2.2.2 Combination rules for road bridges .....	9
A2.2.3 Combination rules for footbridges .....	10
A2.2.4 Combination rules for railway bridges .....	11
A2.2.5 Combinations of actions for accidental (non seismic) design situations .....	11
A2.2.6 Values of factors .....	12
<b>A2.3 ULTIMATE LIMIT STATES</b> .....	<b>16</b>
A2.3.1 Design values of actions in persistent and transient design situations .....	16
A2.3.2 Design values of actions in the accidental and seismic design situations .....	21
<b>A2.4 SERVICEABILITY AND OTHER SPECIFIC LIMIT STATES</b> .....	<b>22</b>
A2.4.1 General .....	22
A2.4.2 Serviceability criteria regarding deformation and vibration for road bridges .....	23
A2.4.3 Verifications concerning vibration for footbridges due to pedestrian traffic .....	23
A2.4.4 Verifications regarding deformations and vibrations for railway bridges .....	25
