## Bases for design of structures - Seismic actions for designing geotechnical works

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols and abbreviated terms .....	7
5	Principles and procedure .....	7
5.1	Principles .....	7
5.2	Procedure for determining seismic actions .....	9
6	Evaluation of earthquake ground motions, ground failure, and fault displacements .....	9
6.1	General .....	9
6.2	Seismic hazard analysis .....	10
6.3	Site response analysis and assessment of liquefaction potential .....	11
6.4	Spatial variation .....	12
6.5	Fault displacements, ground failure, and other geotechnical hazards .....	14
6.6	Paraseismic influences .....	14
7	Procedure for specifying seismic actions .....	14
7.1	Types and models of analysis .....	14
7.2	Seismic actions for equivalent static analysis .....	16
7.3	Seismic actions for dynamic analysis .....	17
8	Seismic actions for equivalent static analysis .....	17
8.1	Seismic actions for simplified equivalent static analysis .....	17
8.2	Seismic actions for detailed equivalent static analysis .....	20
9	Seismic actions for dynamic analysis .....	21
9.1	Seismic actions for simplified dynamic analysis .....	21
9.2	Seismic actions for detailed dynamic analysis .....	23
Annex A (informative) Primary issues for specifying seismic actions .....		24
Annex B (informative) Upper crustal rock, firm ground, and local soil deposit .....		27
Annex C (informative) Design situations for combination of actions .....		29
Annex D (informative) Seismic hazard analysis and earthquake ground motions .....		30
Annex E (informative) Site response analysis .....		36
Annex F (informative) Spatial variation of earthquake ground motion .....		46
Annex G (informative) Assessment of liquefaction .....		51
Annex H (informative) Seismic actions defined for various models of geotechnical works .....		57

<b>Annex I (informative) Soil-structure interaction for designing deep foundations: phase for inertial and kinematic interactions .....</b>	<b>73</b>
<b>Annex J (informative) Limitations in the conventional method and emerging trend for evaluating active earth pressure .....</b>	<b>74</b>
<b>Annex K (informative) Effects of liquefaction considered in various models of geotechnical works</b>	<b>76</b>
<b>Annex L (informative) Evaluation of other induced effects .....</b>	<b>80</b>
<b>Annex M (informative) Concepts of response control and protection .....</b>	<b>83</b>
<b>Annex N (informative) Interdependence of geotechnical and structure designs .....</b>	<b>84</b>
<b>Bibliography .....</b>	<b>85</b>
