Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Tasks for the manufacturer 8
4.1 Factory production control 8
4.1.1 Concept 8
4.1.2 Works' quality manual 8
4.1.3 Management systems 9
4.1.4 System of documentation 9
4.2 Internal quality control 10
4.2.1 Process control 10
4.2.2 Measuring and testing 10
4.2.3 Handling, storage, packaging and delivery 11
4.3 Autocontrol testing of samples 11
4.3.1 Sampling and testing 11
4.3.2 Corrective action 11
4.3.3 Measuring and test equipment for autocontrol testing 11
4.3.4 Quality records 12

5 Tasks for the certification body 12
5.1 General 12
5.2 Surveillance, assessment and acceptance of the production control 12
5.2.1 Inspection tasks 12
5.2.2 Frequency of inspections 12
5.2.3 Reports 12
5.3 Evaluation of the results of autocontrol testing of samples 12
5.3.1 Evaluation tasks 12
5.3.2 Number and timing of evaluations 13
5.3.3 Control period 13
5.3.4 Evaluation of test results 13
5.3.5 Reports 13
5.4 Audit testing of samples taken at the factory/depot and initial type testing 13
5.4.1 Sampling 13
5.4.2 Number of samples 13
5.4.3 Properties and test methods 13
5.4.4 Testing 14
5.4.5 Evaluation of test results 14
5.4.6 Reports 14
5.4.7 Proficiency testing 14
5.5 Initial inspection of the factory and the production control 14
5.5.1 Inspection of a new factory 14
5.5.2 Inspection of an existing factory 15
5.5.3 Criteria for the assessment of the production equipment 15
5.5.4 Criteria for the assessment of laboratories 15
5.5.5 Reports 15
5.6 Evaluation of test results during the initial period 15

5.6.1 Initial period 15
5.6.2 Evaluation of test results 16
5.6.3 Reports 16

6 Actions in the event of non-conformity 16
6.1 Actions to be taken by the manufacturer 16
6.2 Actions to be taken by the certification body 16
6.2.1 Following surveillance, assessment and acceptance of the production control (see 5.2) and evaluation of the results of autocontrol testing (see 5.3) 16
6.2.2 Following evaluation of the results of the audit testing of samples taken at the factory/depot (see 5.4 and Annex A) 16

7 Procedure for third party certification of conformity 17

8 Certificates of conformity and conformity mark 17

9 Requirements for dispatching centres 17
9.1 General requirements 17
9.2 Tasks for the intermediary 18
9.2.1 Measures to maintain the ground granulated blastfurnace slag quality 18
9.2.2 Confirmation autocontrol testing of samples taken at the dispatching centre 18
9.3 Tasks for the third party 18
9.3.1 Surveillance, assessment and acceptance of the measures to maintain the ground granulated blastfurnace slag quality and of the confirmation autocontrol 18
9.3.2 Audit testing of samples taken at the dispatching centre 19
9.3.3 Decisions to be taken 19

Annex A (normative) Evaluation of the representativeness and the accuracy of the 28 day activity index test results 22

A.1 General 22
A.2 Sets of results considered 22
A.3 Evaluation procedure 22
A.3.1 Introduction 22
A.3.2 Symbols 22
A.3.3 Evaluation of whether set A and set B belong to the same population (sampling error check) 23
A.3.4 Comparison between set B and set C in order to check the accuracy of the autocontrol testing (testing error check) 23

Bibliography 24
