Pore size distribution and porosity of solid materials by mercury porosimetry and gas adsorption - Part 2: Analysis of mesopores and macropores by gas adsorption

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Symbols	4
5	Principles	5
5.1	General principles	5
5.2	Choice of method	6
6	Verification of apparatus performance	7
7	Calibration	7
8	Sample preparation	7
9	Static volumetric method	8
9.1	Principle	8
9.2	Apparatus and materials	8
9.3	Typical test procedure	9
9.4	Calculations	11
10	Flow volumetric method	13
10.1	Principle	13
10.2	Apparatus and materials	14
10.3	Typical test procedure	14
10.4	Calculations	14
11	Carrier gas method	14
11.1	Principle	14
11.2	Apparatus and materials	15
11.3	Typical test procedure	15
11.4	Calculations	15
12	Gravimetric method	16
12.1	Principle	16
12.2	Apparatus and materials	16
12.3	Typical test procedure	16
12.4	Calculations	16
13	Types of isotherms	17
13.1	General	17
13.2	Types of hysteresis loops	19
14	Calculation of pore size distribution	20

14.1	The use of reference isotherms	20
14.2	Micropores	21
14.3	Mesopores and macropores	21
14.4	Representation of Pore Size Distribution	23
15	Reporting of results	25
Annex A (informative) Example of calculation of mesopore size distribution		26
