

DIN EN 1997-2:2007-10 (E)

Eurocode 7: Geotechnical design –Part 2: Ground investigation and testing

Contents	Page
Foreword	7
Section 1 General	10
1.1 Scope	10
1.1.1 Scope of Eurocode 7	10
1.1.2 Scope of EN 1997-2.....	10
1.2 Normative references.....	11
1.3 Assumptions	12
1.4 Distinction between Principles and Application Rules	12
1.5 Definitions	13
1.5.1 Terms common to all Eurocodes	13
1.5.2 Terms common to Eurocode 7.....	13
1.5.3 Specific definitions used in EN 1997-2	13
1.6 Test results and derived values	14
1.7 The link between EN 1997-1 and EN 1997-2	15
Section 2 Planning of ground investigations	20
2.1 Objectives	20
2.1.1 General.....	20
2.1.2 Ground	21
2.1.3 Construction materials	22
2.1.4 Groundwater	22
2.2 Sequence of ground investigations	22
2.3 Preliminary investigations	23
2.4 Design investigations.....	24
2.4.1 Field investigations	24
2.4.2 Laboratory tests.....	27
2.5 Controlling and monitoring	31
Section 3 Soil and rock sampling and groundwater measurements	33
3.1 General.....	33
3.2 Sampling by drilling	33
3.3 Sampling by excavation.....	33
3.4 Soil sampling	33
3.4.1 Categories of sampling methods and laboratory quality classes of samples	33
3.4.2 Soil identification.....	34
3.4.3 Planning of soil sampling.....	34
3.4.4 Handling, transport and storing of samples	35
3.5 Rock sampling	35
3.5.1 Categories of sampling methods	35
3.5.2 Rock identification.....	36
3.5.3 Planning of rock sampling	36
3.5.4 Handling, transport and storing of samples	37
3.6 Groundwater measurements in soils and rocks	37
3.6.1 General.....	37
3.6.2 Planning and execution of the measurements	37
3.6.3 Evaluation of results of groundwater measurements	38

Section 4 Field tests in soil and rock	40
4.1 General.....	40
4.2 General requirements.....	40
4.2.1 Planning a specific test programme	40
4.2.2 Execution	41
4.2.3 Evaluation	41
4.3 Cone penetration and piezocone penetration tests (CPT, CPTU).....	42
4.3.1 Objectives	42
4.3.2 Specific requirements.....	42
4.3.3 Evaluation of test results.....	43
4.3.4 Use of test results and derived values	43
4.4 Pressuremeter tests (PMT).....	45
4.4.1 Objectives	45
4.4.2 Specific requirements.....	45
4.4.3 Evaluation of test results	46
4.4.4 Use of test results and derived values	47
4.5 Flexible dilatometer test (FDT)	48
4.5.1 Objectives	48
4.5.2 Specific requirements.....	48
4.5.3 Evaluation of test results.....	48
4.5.4 Use of test results and derived values	49
4.6 Standard penetration test (SPT).....	49
4.6.1 Objectives	49
4.6.2 Specific requirements.....	49
4.6.3 Evaluation of test results	49
4.6.4 Use of test results and derived values	50
4.7 Dynamic probing tests (DP)	51
4.7.1 Objectives	51
4.7.2 Specific requirements.....	52
4.7.3 Evaluation of test results.....	52
4.7.4 Use of test results and derived values	52
4.8 Weight sounding test (WST)	53
4.8.1 Objectives	53
4.8.2 Specific requirements.....	53
4.8.3 Evaluation of test results.....	54
4.8.4 Use of test results and derived values	54
4.9 Field vane test (FVT).....	55
4.9.1 Objectives	55
4.9.2 Specific requirements.....	55
4.9.3 Evaluation of test results	55
4.9.4 Use of test results and derived values	55
4.10 Flat dilatometer test (DMT).....	56
4.10.1 Objectives	56
4.10.2 Specific requirements.....	56
4.10.3 Evaluation of test results.....	56
4.10.4 Use of test results and derived values	57
4.11 Plate loading test (PLT)	57
4.11.1 Objectives	57
4.11.2 Specific requirements.....	58
4.11.3 Evaluation of test results.....	58
4.11.4 Use of test results and derived values	58

Section 5 Laboratory tests on soil and rock	60
5.1 General.....	60
5.2 General requirements for laboratory tests	60
5.2.1.General requirements	60
5.2.2 Procedures, equipment and presentation.....	60
5.2.3 Evaluation of test results	60
5.3 Preparation of soil specimens for testing.....	61
5.3.1 Objective	61
5.3.2 Requirements	61
5.4 Preparation of rock specimens for testing	62
5.4.1 Objective	62
5.4.2 Requirements	62
5.5 Tests for classification, identification and description of soil	63
5.5.1 General	63
5.5.2 Requirements for all classification tests	63
5.5.3 Water content determination.....	63
5.5.4 Bulk density determination	64
5.5.5 Particle density determination.....	64
5.5.6 Particle size analysis	64
5.5.7 Consistency limits determination.....	65
5.5.8 Determination of the density index of granular soil	66
5.5.9 Soil dispersibility determination	67
5.5.10 Frost susceptibility	68
5.6 Chemical testing of soil and groundwater	68
5.6.1 Requirements for all chemical tests	68
5.6.2 Organic content determination.....	70
5.6.3 Carbonate content determination	71
5.6.4 Sulfate content determination	71
5.6.5 pH value determination (acidity and alkalinity)	72
5.6.6 Chloride content determination.....	72
5.7 Strength index testing of soil	73
5.7.1 Objective	73
5.7.2 Requirements	73
5.7.3 Use of test results	73
5.8 Strength testing of soil.....	73
5.8.1 Objective and scope	73
5.8.2 General requirements	74
5.8.3 Evaluation and use of test results.....	75
5.8.4 Unconfined compression test.....	75
5.8.5 Unconsolidated, undrained triaxial compression test	76
5.8.6 Consolidated triaxial compression test	76
5.8.7 Consolidated direct shear box tests.....	77
5.9 Compressibility and deformation testing of soil.....	78
5.9.1 General	78
5.9.2 Oedometer compressibility testing	78
5.9.3 Triaxial deformability testing	80
5.10 Compaction testing of soil.....	81
5.10.1 Scope.....	81
5.10.2 Compaction tests.....	81
5.10.3 California Bearing ratio (CBR) test	81

5.11 Permeability testing of soil	82
5.11.1 Objective	82
5.11.2 Requirements	82
5.11.3 Evaluation and use of test results	83
5.12 Tests for classification of rocks	84
5.12.1 General	84
5.12.2 Requirements for all classification tests	84
5.12.3 Rock identification and description	84
5.12.4 Water content determination	85
5.12.5 Density and porosity determination	86
5.13 Swelling testing of rock material	86
5.13.1 General	86
5.13.2 General requirements	87
5.13.3 Evaluation of test results	87
5.13.4 Swelling pressure index under zero volume change	87
5.13.5 Swelling strain index for radially-confined specimens with axial surcharge	88
5.13.6 Swelling strain developed in unconfined rock specimen	89
5.14 Strength testing of rock material	89
5.14.1 General	89
5.14.2 Requirements for all strength tests	89
5.14.3 Evaluation of test results	90
5.14.4 Uniaxial compression and deformability test	90
5.14.5 Point load test	91
5.14.6 Direct shear test	92
5.14.7 Brazil test	93
5.14.8 Triaxial compression test	94
Section 6 Ground investigation report	95
6.1 General requirements	95
6.2 Presentation of geotechnical information	95
6.3 Evaluation of geotechnical information	96
6.4 Establishment of derived values	97
Annex A (informative) List of test results of geotechnical test standards	98
Annex B (informative) Planning of geotechnical investigations	101
Annex C (informative) Example of groundwater pressure derivations based on a model and long term measurements	109
Annex D (informative) Cone and piezocone penetration tests	111
Annex E (informative) Pressure meter test	121
Annex F (informative) Standard penetration test	125
Annex G (informative) Dynamic probing test	129
Annex H (informative) Weight sounding test	134
Annex I (informative) Field vane test	133
Annex J (informative) Flat dilatometer test Example of correlations between E_{OED} and DMT results	138
Annex K (informative) Plate loading test	139
Annex L (informative) Detailed information on preparation of soil specimens for testing	143
Annex M (informative) Detailed information on tests for classification, identification and description of soil	150
Annex N (informative) Detailed information on chemical testing of soil	157

Annex O	(informative) Detailed information on strength index testing of soil	162
Annex P	(informative) Detailed information on strength testing of soil	163
Annex Q	(informative) Detailed information on compressibility testing of soil	165
Annex R	(informative) Detailed information on compaction testing of soil	166
Annex S	(informative) Detailed information on permeability testing of soil	168
Annex T	(informative) Preparation of specimen for testing on rockmaterial	170
Annex U	(informative) Classification testing of rock material	171
Annex V	(informative) Swelling testing of rock material	173
Annex W	(informative) Strength testing of rock material	175
Annex X	(informative) Bibliography	180
