

DIN EN 1670:2007-06 (E)

Building hardware - Corrosion resistance - Requirements and test methods

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Classification	6
5	Requirements	6
5.1	General	6
5.2	General test requirements	6
5.3	Functional acceptance condition	7
5.4	Appearance acceptance condition	7
5.4.1	General	7
5.4.2	Degree of rust	7
5.4.3	Degree of blistering	7
6	Test conditions	7
6.1	General conditions	7
6.2	Treatment following the corrosion test	8
7	Marking	8
Annex A (informative)	Examples of service conditions for which the various grades of corrosion resistance are appropriate	9
Bibliography		10
