Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Classification 5

5 Material 5

6 Preparation of test specimens 6

7 Sampling 6

8 Requirements 6

9 Packaging, marking and information to be supplied by manufacturer 7

Annex A (normative) Determination of net setting time 10

Annex B (informative) Chemical composition and applications of dental cements 12

Annex D (normative) Determination of compressive strength 15

Annex E (normative) Determination of acid erosion 17

Annex G (normative) Determination of acid-soluble arsenic and lead contents 23

Annex H (normative) Determination of radio-opacity 24

Bibliography 26

Annex F (normative) Determination of optical properties (polyalkenoate restorative cements only) .20

Annex C (normative) Determination of film thickness (luting cements only) 13
