Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Classification 2

5 Requirements 3
5.1 Efficiency 3
5.2 Warning system for collecting container 3
5.3 Alarm system for collecting container 3
5.4 Alarm system for malfunction of amalgam separator 3
5.5 Removal of removable filled collecting container 3
5.6 Maximum fillable volume of the removable collecting container 4
5.7 Electrical safety 4

6 Sampling 4

7 Test apparatus 4
7.1 Set-up of test apparatus 4
7.2 Installation of amalgam separator 5

8 Test sample 7
8.1 Preparation of test sample 7
8.2 Particle fraction sizes 7
8.3 Mass of dry test sample 7
8.4 Particle fraction size distribution 7
8.5 Preparation of test slurry 9
8.5.1 Reagents 9
8.5.2 Apparatus 9
8.5.3 Procedure 9

9 Test method 10
9.1 General 10
9.2 Preconditioning 10
9.3 Efficiency test 10
9.4 Number of tests 13
9.5 Calculation of efficiency 13
9.6 Determination of efficiency 14
9.7 Test of warning system for removable collecting container 14
9.8 Test of alarm system for removable collecting container 14
9.9 Test of alarm system for malfunction of amalgam separator 14
9.10 Removal of filled collecting container 14
9.11 Maximum fillable volume of the removable collecting container 14
9.12 Electrical safety 14

10 Test report 15

11 Manufacturer's instructions for installation, use, maintenance and service 16
12 Marking 16
12.1 General 16
12.2 Marking of amalgam separator 17
12.3 Marking of liquid inlet and outlet of the amalgam separator 17
12.4 Marking of removable collecting container 17

Annex A (informative) Preparation of amalgam test sample 18

Annex B (informative) Procedure for grinding the hardened amalgam 21

Annex C (informative) Examination of particle fraction 3 using sedimentation with X-ray absorption 22

Annex D (informative) Particle fraction size distribution of amalgam in dental waste water 24

Bibliography 25
