# DIN EN ISO 4049:2010-03 (E)

## Dentistry - Polymer-based restorative materials (ISO 4049:2009)

## Contents

Page

Foreword ..... 3

Introduction ..... 4

1 Scope ..... 5

2 Normative references ..... 5

3 Terms and definitions ..... 5

4 Classification ..... 6

5 Requirements ..... 6
5.1 Biocompatibility ..... 6
5.2 Physical and chemical properties ..... 6
5.3 Shade, restorative materials ..... 8
5.4 Colour stability after irradiation and water sorption ..... 8
5.5 Radio-opacity ..... 8

6 Sampling ..... 9

7 Test methods ..... 9
7.1 General reagent -- Water ..... 9
7.2 Test conditions ..... 10
7.3 Inspection ..... 10
7.4 Preparation of test specimens ..... 10
7.5 Measurement of film thickness of luting materials ..... 10
7.6 Working time, Class 1 and Class 3 restorative materials, excluding luting materials ..... 13
7.7 Working time, Class 1 and Class 3 luting materials ..... 15
7.8 Setting time, Class 1 and Class 3 materials ..... 15
7.9 Sensitivity to ambient light, Class 2 materials ..... 17
7.10 Depth of cure, Class 2 materials ..... 18
7.11 Flexural strength ..... 19
7.12 Water sorption and solubility ..... 22
7.13 Shade and colour stability after irradiation and water sorption ..... 25
7.14 Radio-opacity ..... 26

8 Packaging, marking and instructions and information to be supplied by the manufacturer ..... 29
8.1 Packaging ..... 29
8.2 Marking ..... 29
8.3 Manufacturer's instructions and information for the user ..... 31

Bibliography ..... 32
