# ISO 23325:2020 (E)

## Dentistry — Corrosion resistance of dental amalgam

# Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Sampling

5 Requirement

6 Preparation of the dental amalgam test-piece

- 6.1 General
- 6.1.1 Temperature
- 6.1.2 Mixing
- 6.2 Apparatus for the preparation of the dental amalgam test-piece
- 6.3 Materials and tolerances for construction of the mould
- 6.4 Packing the mould, removal of test-piece and inspection for surface defects

7 Test solution (artificial saliva)

- 7.1 Reagents
- 7.2 Stock solutions
- 7.2.1 Stock Solution A
- 7.2.2 Stock Solution B
- 7.2.3 Stock Solution C
- 7.3 Test solution

8 Procedure for test-piece conditioning

- 8.1 Apparatus
- 8.2 Control test-pieces
- 8.3 Corrosion test-pieces
- 8.4 Replacement test-pieces

9 Mechanical testing

- 9.1 Apparatus for mechanical testing
- 9.2 Procedure
- 9.2.1 Loading arrangement
- 9.2.2 Force application and fracture
- 9.3 Treatment of data

10 Test report
