ISO 1942:2020 (E)

Dentistry — Vocabulary

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

3.1 Dental terminology and general terms
3.1.1 Anatomical concepts
3.1.2 Branches of dentistry
3.1.3 Clinical concepts
3.1.4 Devices and occupational concepts
3.2 Restorative and orthodontic materials
3.2.1 ZOE cements
3.2.2 Endodontic materials
3.2.3 Resin-based pit and fissure sealants
3.2.4 Amalgam/mercury
3.2.5 Luting cements, bases and liners
3.2.6 Orthodontic products
3.2.7 Adhesive and etching components
3.3 Prosthodontic materials
3.3.1 General prosthodontics concepts
3.3.2 Dental ceramics
3.3.3 Impression materials
3.3.4 Noble metal casting alloys
3.3.5 Resilient lining materials
3.3.6 Denture base polymers
3.3.7 Dental waxes
3.3.8 Artificial teeth
3.4 Instruments
3.4.1 Rotary instruments
3.4.2 Dental handpieces
3.4.3 Dental hand instruments
3.4.4 Endodontic instruments
3.5 Dental equipment
3.6 Oral care products
3.7 Dental implants

Annex A (informative) Information helpful to understand the structure and content of ISO 1942

A.1 General
A.2 Introduction
A.3 Concerning the number of terminological entries in 3.2 to 3.8
A.3.1 General
A.3.2 For entries to be included
A.3.3 For entries to be excluded
A.4 Structure of individual terminological entries — Features common to all terminological entries listed in 3.2 to 3.8
