Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Classification 3

4.1 Applicable classifications 3

4.2 Classification according to the degree of integration and location 3

4.2.1 General 3

4.2.2 Type A: Fully integrated 3

4.2.3 Type B: Remote 3

4.2.4 Type C: Standalone 3

4.3 Classification according to air flow rate 3

5 Requirements 4

5.1 General 4

5.2 Protection against electric shock 4

5.3 Safety requirements 4

5.4 Electromagnetic compatibility 4

5.5 Utility requirements 5

5.5.1 Compressed air supply 5

5.5.2 Suction waste container 5

5.6 Operational requirements 5

5.6.1 General 5

5.6.2 Cleaning 5

5.7 Characterization of portable suction equipment flow rate performance 5

5.8 Maximum suction pressure 5

5.9 Amalgam separator 6

5.10 Bacterial filter 6

6 Sampling 6

7 Measurement and test methods 6

7.1 General 6

7.1.1 General provisions for tests 6

7.1.2 Reference conditions (air flow rates) 6

7.1.3 Atmospheric conditions 6

7.1.4 Other conditions 7

7.2 Performance tests 7

7.2.1 Measurement of flow rate performance 7

7.2.2 Measurement of maximum suction pressure of portable suction equipment types A and C 7

7.2.3 Measurement of maximum suction pressure of type B portable suction equipment 7

7.2.4 Measures to prevent excessive suction pressure 8

7.3 Bacterial filters 8

7.4 Visual inspection 8

7.4.1 Visual inspection equipment 8

7.4.2 Visual inspection of documentation 8

7.5 Resistance to solutions for the cleaning process 8

7.5.1 Principle 8
7.5.2 Test specimens 8
7.5.3 Test conditions 8
7.5.4 Solution(s) for the cleaning process 9
7.5.5 Immersion procedure 9
7.5.6 Inspection 10

8 Information supplied by the manufacturer 10
8.1 General 10
8.2 Instructions for use 10
8.3 Technical description 11

9 Marking 12
9.1 General 12
9.2 Marking on the outside of electrically operated portable suction equipment 12
9.3 Marking of packaging 12

10 Packaging 12
