European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Abbreviated terms and notations 8

5 Principles of maintenance process breakdown 9
5.1 Process families 9
5.2 Breakdown into levels 10
5.3 Use of the Maintenance process breakdown 12

6 Breakdown of the maintenance process and process profiles 13
6.1 Maintenance process 13
6.2 MAN process: Manage maintenance 15
6.3 PRV process: Prevent undesirable events by avoiding failures and faults 19
6.3.1 General 19
6.3.2 PRV.1 - Characterize the undesirable events 19
6.3.3 PRV.2 - Use and update the Maintenance Plans 21
6.4 COR process: Restore the items to their required state 23
6.4.1 General 23
6.4.2 COR.1 - Classify the actual events 24
6.4.3 COR.2 - Diagnose the state of the items in question 24
6.5 ACT process: Act preventively and/or correctively on the items to maintain 27
6.5.1 General 27
6.5.2 ACT.1 - Rank the events 28
6.5.3 ACT.2 - Prepare for the maintenance tasks 29
6.5.4 ACT.3 - Set in order the tasks 30
6.5.5 ACT.4 - Schedule the tasks 31
6.5.6 ACT.5 - Start the scheduled tasks 32
6.5.7 ACT.6 - Perform the maintenance tasks 33
6.5.8 ACT.7 - Finalise the maintenance tasks 34
6.6 IMP process: Improve the items 36
6.7 HSE process: Ensure personal health and safety to individuals and preserve environment in maintenance 39
6.8 BUD process: Budget maintenance of items 42
6.9 DOC process: Deliver the operational documentation 45
6.10 DTA process: Manage data 48
6.11 IST process: Provide the needed infrastructures 52
6.12 MRG process: Deliver maintenance requirements during items design and modification 55
6.13 OPT process: Improve the results 58
6.14 RES process: Provide internal human resources 61
6.15 SER process: Provide external maintenance services 64
6.16 SPP process: Deliver spare parts 67
6.17 TOL process: Deliver the tools, support equipment and information system 72
