DIN EN 16991:2018-07 (E)

Risk-based inspection framework

Contents

Page

European foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Abbreviated terms 10

5 The RBI framework 11
5.1 RBIF principles 11
5.2 RBIF requirements 12
5.2.1 General requirements 12
5.2.2 Plant and process documentation 13
5.2.3 Personnel requirements 14
5.2.4 Requirements for performing CoF analysis 15
5.2.5 Requirements for performing PoF analysis 16
5.2.6 Requirements for risk assessment 18
5.3 RBIF within the overall management system 18
5.4 Compatibility with other known approaches 19

6 The RBIF process 19

7 Initial analysis and planning 21
7.1 General description and scope 21
7.1.1 General 21
7.1.2 Planning and the preliminary analysis 21
7.1.3 Definition of objectives 21
7.1.4 Definition of systems, sub-systems (loops) and equipment to be considered 22
7.1.5 Definition of the scope of analysis 22
7.1.6 Definition of data sources available 22
7.1.7 Definition of regulations to be considered 23
7.1.8 Team specifications 23
7.1.9 Tools to be used 24
7.1.10 Accuracy of the acceptance of the methodology 24
7.2 Requirements 24
7.3 Inputs 24
7.4 Procedure 25
7.5 Output 25
7.6 Warnings and applicability limits 25

8 Data collection and validation 26
8.1 General description and scope 26
8.2 Requirements 26
8.3 Input 27
8.3.1 General 27
8.3.2 Collect and validate documented data 27
8.3.3 Collect relevant non-documented data 28
8.4 Procedure 28

8.5 Output 29
8.6 Warnings and applicability limits 29

9 Multilevel risk analysis (ranging from screening to detailed) 30
9.1 General description and scope 30
9.2 Risk analysis - screening level 30
9.2.1 General 30
9.2.2 Inputs 31
9.2.3 Procedure 31
9.2.4 Output 31
9.3 Risk analysis - detailed assessment 32
9.3.1 General 32
9.3.2 Requirements 33
9.3.3 Inputs 33
9.3.4 Procedure 34
9.3.5 Output 36

10 Decision making/action plan 38
10.1 General description and scope 38
10.2 Requirements 38
10.3 Inputs 39
10.4 Procedure 39
10.4.1 General 39
10.4.2 Define degradation groups and relevant susceptible areas 40
10.5 Output 41
10.6 Warnings and applicability limits 42

11 Execution and reporting 42
11.1 General description and scope 42
11.2 Input 43
11.3 Procedure 43
11.4 Output 46
11.5 Warning/ application limits 46

12 Performance review/Evergreening phase 46
12.1 General description and scope 46
12.2 Requirements 47
12.3 Inputs 47
12.4 Procedure 48
12.4.1 General 48
12.4.2 Work process efficiency benchmarking 48

Annex A (informative) Assessments 50

A.1 Example of a multilevel RBI analysis in power industry 50
A.2 Example of screening and detailed risk assessment 54
A.3 Reliability of risk assessment results in the screening phase 58
A.4 Example of assessment of damage/failure probability 59
A.5 Example of probability and consequence factors for qualitative analysis on the screening and detailed levels 60
A.6 Examples of types of in-service damage and their specifications 61
A.7 Example of various types of damage and their specifications in relation to hierarchical structure of the plant 63
A.8 Example of classification of type of damage vs. prioritized methods of inspection 65
A.9 Example for determination of PoF 68
A.10 Example for determination of CoF 70
A.11 Example of KPIs and objectives for selection 76
A.12 Example of a RBI management system evaluation questionnaire [34] 79
A.13 Example of formulation and degradation of components, structures and systems 81
