DIN EN 17837:2026-04 (E)

Postal Services - Parcel Delivery Environmental Footprint - Methodology for calculation and declaration of GHG emissions and air pollutants of parcel logistics delivery services

Contents

Page

European foreword 5

Introduction 6

1 Scope 8

2 Normative references 8

3 Terms and definitions 8
3.1 General terms 8
3.2 Specific terms 17

4 Symbols and units 19

5 General principles 19

6 Quantification boundaries 20
6.1 Definition of parcel delivery elements 20
6.1.1 General 20
6.1.2 Modes of transport 21
6.1.3 Location operations 21
6.2 Principles of quantification 22
6.2.1 General 22
6.2.2 Processes included 22
6.2.3 Processes not included 24
6.2.4 Carbon offsetting and emissions trading 25
6.3 Principles of allocation 25
6.3.1 General 25
6.3.2 Allocation parameter 25
6.3.3 Allocation 26

7 Activities regarding the quantification and reporting of environmental impacts from parcel delivery service 26
7.1 Steps in the quantification of emissions within a parcel transport chain 26
7.2 Identification of the different elements within a parcel transport chain 27
7.3 Sub steps for the calculation of emissions 29
7.3.1 Transport operation 29
7.3.2 Location operation 30
7.4 Operational data inputs used for the calculation 30
7.4.1 Transport operation 30
7.4.2 Location operation 32
7.4.3 Use of default values 33

8 Quantification of emissions 33
8.1 At the transport operation category level 33
8.1.1 General 33
8.1.2 Sub step 3.1-T: Establishing a transport operation category (TOC) 33
8.1.3 Sub step 3.2-T: Quantification of the emission activity data for the TOC 34
8.1.4 Sub step 3.3-T: Calculation of emissions for the TOC 34

8.2 At the Hub Operation Category level ... 36
8.2.1 General ... 36
8.2.2 Sub step 3.1-L: Establishing a Hub Operation Category (HOC) ... 36
8.2.3 Sub step 3.2-L: Quantification of activity data for the HOC ... 36
8.2.4 Sub step 3.3-L: Calculation of emissions for the HOC ... 37

9 Allocation of emissions to parcel level ... 38
9.1 Transport operation ... 38
9.1.1 General ... 38
9.1.2 Allocation parameters and units ... 39
9.1.3 Allocation by transport operator ... 42
9.1.4 Allocation by the transport service organizer ... 43
9.2 Location operation ... 43
9.2.1 General ... 43
9.2.2 Allocation parameter ... 44
9.2.3 Allocation by transport operator ... 44
9.2.4 Allocation by parcel transport service organizer ... 45

10 Approach to summing the results for each parcel transport chain element ... 45

11 Reporting ... 46

Annex A (informative) GHG emission factors ... 47

A.1 General ... 47

Annex B (normative) Allocation methods for combined parcel and passengers ... 50

B.1 General ... 50
B.2 Mass method ... 50
B.3 Area method ... 50
B.4 Default values ... 51

Annex C (informative) Inclusion of empty trips into a TOC ... 52

C.1 General ... 52
C.2 Example for a simple case ... 52
C.3 Example of a parcel collection and delivery round trip ... 53

Annex D (informative) Template for declaration of categories of values used ... 54

Annex E (informative) Example of available sources of default values ... 56

Annex F (informative) Sample calculation example ... 58

F.1 Calculation of air pollutant emissions ... 58
F.1.1 Road transport-related air pollutant emission calculations ... 58
F.1.2 Electricity-related air pollutant emission calculations ... 61
F.1.3 Calculation of a parcel specific air pollutant emission values ... 62
F.2 Calculation of 4 parcel specific GHG emission values ... 66
F.2.1 General ... 66
F.2.2 Identify HOCs and TOCs ... 69
F.2.3 Quantify GHG emissions ... 69
F.2.4 Allocate GHG emissions ... 72
F.2.5 Final Results to be reported ... 75
F.3 Calculation of parcel specific emission values for packaging materials ... 76
F.3.1 General ... 76
F.3.2 Identify HOCs and TOCs ... 76
F.3.3 Quantify GHG emissions ... 77
F.3.4 Allocate GHG emissions ... 77
F.4 Calculation of parcel specific emission values for cloud computing ... 78
F.4.1 General ... 78

F.4.2 Identify HOCs and TOCs 78
F.4.3 Quantify GHG emissions 78
F.4.4 Allocate GHG emissions 78
F.5 Calculation of parcel specific emission values for waste 79
F.5.1 General 79
F.5.2 Identify HOCs and TOCs 79
F.5.3 Quantify GHG emissions 79
F.5.4 Allocate GHG emissions 80
