DIN EN 614-2:2008-12 (E)

Safety of machinery - Ergonomic design principles - Part 2: Interactions between the design of machinery and work tasks (includes Amendment A1:2008)

Contents

Page

Foreword 3

Introduction 4

1 Scope 4

2 Normative references 4

3 Terms and definitions 5

4 Principles of work task design 5
4.1 Characteristics of well-designed operator work tasks 5
4.2 Methodology of work task design in relation to machinery design 6
4.2.1 Establishing the design objectives 10
4.2.2 Function analysis 10
4.2.3 Function allocation 11
4.2.4 Work task specification 12
4.2.5 Assignment of work tasks to operators 12
4.3 Evaluation of work task design 13

5 Design procedure 14

Annex A (informative) Interaction between machinery design, task design and job design 15

A.1.1 Good job design 15
A.2 Characteristics of well-designed jobs and implications for design 17
A.2.1 Experience and capabilities of the operator 17
A.2.2 Meaningful whole 17
A.2.3 Contribution to the total work output 17
A.2.4 Variation 17
A.2.5 Autonomy 17
A.2.6 Learning opportunities 17
A.2.7 Feedback 17
A.2.8 Over- and underload 17
A.2.9 Repetitiveness 18
A.2.10 Opportunities for contact 18
A.3 Ways of job re-design 18
A.3.1 Job rotation, job enlargement and job enrichment 18
A.3.2 Working groups and teams 18
A.3.3 Participative design 19
A.3.4 Managerial development 19

Annex B (informative) Illustrative example: Design of a drilling machine 20

B.1 Introduction 20
B.2 Establishing design objectives 21
B.3 Function analysis 22
B.4 Function allocation 24
B.5 Work task specification 26

Annex ZA (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC, amended by 98/79/EC""""" 28

Annex ZB (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC""""" 29
