

DIN EN 614-2:2008-12 (E)

Safety of machinery - Ergonomic design principles - Part 2: Interactions between the design of machinery and work tasks (includes Amendment A1:2008)

Contents		Page
Foreword		3
Introduction		4
1	Scope	4
2	Normative references	4
3	Terms and definitions	5
4	Principles of work task design	5
4.1	Characteristics of well-designed operator work tasks	5
4.2	Methodology of work task design in relation to machinery design	6
4.2.1	Establishing the design objectives	10
4.2.2	Function analysis	10
4.2.3	Function allocation	11
4.2.4	Work task specification	12
4.2.5	Assignment of work tasks to operators	12
4.3	Evaluation of work task design	13
5	Design procedure	14
Annex A (informative) Interaction between machinery design, task design and job design		15
A.1.1	Good job design	15
A.2	Characteristics of well-designed jobs and implications for design	17
A.2.1	Experience and capabilities of the operator	17
A.2.2	Meaningful whole	17
A.2.3	Contribution to the total work output	17
A.2.4	Variation	17
A.2.5	Autonomy	17
A.2.6	Learning opportunities	17
A.2.7	Feedback	17
A.2.8	Over- and underload	17
A.2.9	Repetitiveness	18
A.2.10	Opportunities for contact	18
A.3	Ways of job re-design	18
A.3.1	Job rotation, job enlargement and job enrichment	18
A.3.2	Working groups and teams	18
A.3.3	Participative design	19
A.3.4	Managerial development	19
Annex B (informative) Illustrative example: Design of a drilling machine		20
B.1	Introduction	20
B.2	Establishing design objectives	21
B.3	Function analysis	22
B.4	Function allocation	24
B.5	Work task specification	26

Annex ZA (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC, amended by 98/79/EC""""	28
Annex ZB (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC""""	29
