

DIN EN ISO 28802:2012-06 (E)

Ergonomics of the physical environment - Assessment of environments by means of an environmental survey involving physical measurements of the environment and subjective responses of people (ISO 28802:2012)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Designing an environmental survey	6
4.1	Aim of survey	6
4.2	Measurement of the physical environment	6
4.3	Measurement of subjective responses	7
4.4	Where to measure?	7
4.5	What to measure?	8
4.6	When to measure?	8
4.7	How many people and who?	8
4.8	Adaptive opportunities	8
5	Measurement of the thermal environment	9
5.1	Physical measures	9
5.2	Subjective measures	9
5.3	Observation/assessment	11
6	Measurement of the acoustical environment	12
6.1	Physical measures	12
6.2	Subjective measures	12
6.3	Observation/assessment	13
7	Measurement of the visual and lighting environment	13
7.1	Physical measures	13
7.2	Subjective measures	13
7.3	Observation assessment	14
8	Measurement of the air quality environment	15
8.1	Physical measures	15
8.2	Subjective measures	15
8.3	Observation assessment	15
9	Measurement of the vibration environment	16
9.1	Physical measures	16
9.2	Subjective measures	16
9.3	Observation/assessment	17
10	Other environmental factors	17
Annex A (informative)	Example of an environmental survey in a building	18
