

ISO/IEC 20382-1:2017-10 (E)

Information technology - User interfaces - Face-to-face speech translation - Part 1: User interface

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	Overview of face-to-face speech translation	2
5.1	General	2
5.2	Service flow	3
5.3	Service types	4
5.4	Service mode	4
5.5	Service situation	4
6	Functional requirements	4
6.1	User communication requirements	4
6.1.1	General	4
6.1.2	Required	4
6.1.3	Optional	4
6.2	User interface requirements	5
6.2.1	General	5
6.3	User device requirements	5
6.3.1	General	5
6.4	Accessibility requirements	5
6.4.1	General	5
7	Functional components of face-to-face speech translation	6
7.1	Service protocol among functional components	6
7.2	User communication functional block	7
7.2.1	General	7
7.2.2	Steps for user communication	7
7.2.3	Translation session connection	8
7.2.4	Translation session disconnection	9
7.2.5	Translation session end condition	10
7.3	User interface functional block	11
7.3.1	General	11
7.3.2	Setup of the initial translation environments	11
7.3.3	Correction/selection function of speech recognition results:	12
7.4	User device functional block	12
7.4.1	General	12
7.4.2	SRWC pairing function for search for users and VI control	12
7.4.3	Wearable device functions	12
7.4.4	Communication between devices and message representation	13
7.5	Accessibility functional block	13
7.5.1	General	13
7.5.2	Multi-modal input functions	13

7.5.3	Multi-modal output functions	13
7.5.4	Voice input and output functions	13
7.5.5	Accessibility functions for the application user interface (UI)	13
7.5.6	Simple language, or controlled language function	13
Annex A (informative) Comparison of standardization activities for speech translation		14
Bibliography		15
