ISO 9241-11:2018 (E)

Ergonomics of human-system interaction — Part 11: Usability: Definitions and concepts

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Rationale and benefits of usability

5 Usability in a context of use

5.1 Concept of usability
5.2 System, product or service
5.3 Consideration of usability for “specified” circumstances
5.3.1 General
5.3.2 Specified users
5.3.3 Specified goals
5.3.4 Specified contexts of use

6 Outcomes of use

6.1 Usability as an outcome
6.2 Effectiveness
6.2.1 General
6.2.2 Accuracy
6.2.3 Completeness
6.3 Efficiency
6.3.1 General
6.3.2 Time used
6.3.3 Human effort expended
6.3.4 Financial resources expended
6.3.5 Materials expended
6.4 Satisfaction
6.4.1 General
6.4.2 Physical responses
6.4.3 Cognitive responses
6.4.4 Emotional responses
6.5 Specific uses of the concept of usability
6.6 Other outcomes of use
6.6.1 General
6.6.2 Accessibility
6.6.3 User experience
6.6.4 Avoidance of harm from use

7 Context of use

7.1 Components of the context of use
7.2 Users within the context of use
7.3 Goals within the context of use
7.4 Tasks within the context of use
7.5 Resources
7.5.1 General
7.5.2 Reusable resources

7.5.3 Expendable resources
7.6 Environment
7.6.1 General
7.6.2 Technical environment
7.6.3 Physical environment
7.6.4 Social, cultural and organizational environment

8 Applying the concept of usability

8.1 Usability that results from use of various objects of interest
8.2 Characteristics of users, tasks and environments needed for usability
8.3 Achieving usability in design and development
8.4 Usability in procurement
8.5 Usability in a review or when making a comparison
8.6 Usability inputs to marketing and market research

Annex A (informative) Relationship of usability to other concepts

A.1 General
A.2 Human-centred design
A.3 Ergonomics/human factors
A.4 Human-centred organization
A.5 Social responsibility
A.6 Human-centred quality
A.6.1 General
A.6.2 Accessibility
A.6.3 User experience
A.6.4 Avoidance of harm from use
A.7 Relationship of usability to other qualities of systems, products and services
A.7.1 System and software product quality in the ISO/IEC 25000 series
A.7.1.1 General
A.7.1.2 Quality in use
A.7.1.3 Product quality model
A.7.1.4 Service quality
A.7.2 Hardware quality
A.7.3 Safety, trust, privacy and security

Annex B (informative) Usability measurement

B.1 General
B.2 Measures of effectiveness, efficiency and satisfaction
B.3 Uses of measures
