## Ergonomics of human-system interaction - Part 126: Guidance on the presentation of auditory information

---

<b>Contents</b>		<b>Page</b>
Foreword .....		vi
Introduction .....		vii
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Application .....	3
4.1	Accessibility .....	3
4.2	Applying the recommendations in this document .....	4
5	Appropriate usage .....	4
5.1	Visual system unavailability .....	4
5.2	Inadequate or excessive light .....	4
5.3	Inability to maintain visual attention .....	4
5.4	Message brevity and simplicity .....	4
5.5	Event-based messages .....	5
5.6	Messages requiring immediate action .....	5
5.7	Messages requiring verbal response .....	5
5.8	Permanence of message relevance .....	5
5.9	Attention capture .....	5
5.10	Muting sound .....	5
6	Auditory presentation .....	5
6.1	General .....	5
6.1.1	Auditory channel overload .....	5
6.1.2	Information conciseness .....	5
6.1.3	Avoid extreme dimensions .....	5
6.1.4	Monaural option .....	6
6.1.5	Ease of learning .....	6
6.1.6	Signal invariance .....	6
6.1.7	Signal similarity .....	6
6.1.8	Two-stage signal usage .....	6
6.1.9	Logical sequencing .....	6
6.1.10	Supporting short term memory .....	6
6.1.11	Cross-cultural sounds .....	7
6.1.12	Representative sounds .....	7
6.1.13	Representative sound usage .....	7
6.2	Detectability in noisy environments .....	7
6.2.1	Signal distinctiveness .....	7
6.2.2	Change signal frequency .....	7
6.2.3	Signal duration in noisy environments .....	7
7	Auditory dimensions .....	7
7.1	Frequency .....	7
7.1.1	Absolute pitch identification .....	7
7.1.2	Temporal proximity for pitch comparison .....	7
7.1.3	Similarity for pitch comparison .....	7

7.1.4	Minimum difference for pitch comparison .....	8
7.1.5	Frequency range for pitch identification .....	8
7.1.6	Frequency range for most accurate pitch discrimination .....	8
7.1.7	Harmonicity for pitch identification .....	8
7.1.8	Harmonic tones for pitch discrimination tasks .....	8
7.1.9	Long-distance sound .....	8
7.1.10	Obstructed sound .....	8
7.2	Intensity .....	8
7.2.1	Avoid distortion .....	8
7.2.2	Separate signal control .....	8
7.2.3	Loudness cues about the environment .....	9
7.2.4	Minimal signal intensity .....	9
7.2.5	Signal intensity for rapid response .....	9
7.2.6	Relative maximal signal intensity .....	9
7.2.7	Absolute maximal signal loudness .....	9
7.3	Timbre .....	9
7.3.1	Timbre discrimination .....	9
7.3.2	Musical instrument timbres .....	9
7.4	Localization .....	9
7.4.1	Guidance related to lateral sound localization .....	9
7.4.2	Minimum angle for position discrimination .....	10
7.4.3	Frequency selection for sound localization .....	10
7.4.4	Minimum distance for front/back position identification .....	10
7.4.5	Guidance related to distance judgment .....	10
7.4.6	Doppler effect .....	10
7.4.7	Guidance related to elevation angle judgment .....	10
7.5	Duration .....	11
7.5.1	Minimum signal duration .....	11
7.5.2	Adjustable signal duration .....	11
7.6	Rhythm and accent usage .....	11
7.7	Timing .....	11
7.7.1	Event-based sounds .....	11
7.7.2	Sounds to guide rhythmic movements .....	11
7.7.3	Concurrent auditory streams .....	11
8	Speech .....	11
8.1	Appropriate usage .....	11
8.1.1	Complex messages .....	11
8.1.2	Source identification .....	11
8.1.3	Untrained users .....	12
8.1.4	Stressful context of use .....	12
8.1.5	Rapid information exchange .....	12
8.2	General speech presentation .....	12
8.2.1	Eliminate non-relevant speech .....	12
8.2.2	Audio volume consistency .....	12
8.2.3	Monophonic speech presentation .....	12
8.2.4	Present messages serially .....	12
8.2.5	Information brevity .....	12
8.2.6	Message replay .....	12
8.2.7	Option phrase sequencing .....	12
8.2.8	Grouping information .....	13
8.3	Language .....	13
8.3.1	Language and dialect control .....	13
8.3.2	Avoid dialect-specific expressions .....	13
8.3.3	Vocabulary used in prompts .....	13
8.3.4	Consistency of terminology use .....	13
8.3.5	Unambiguous prompts .....	13
8.3.6	Simple linguistic forms .....	13
8.3.7	Minimum syllable count .....	13
8.3.8	Sentence usage .....	13
8.4	Voice .....	13

8.4.1	Use of synthetic speech .....	13
8.4.2	Source voice identification .....	14
8.4.3	Dialects and accents .....	14
8.4.4	Speech output rate .....	14
8.4.5	Intonation and prosody .....	14
9	Earcons .....	14
9.1	Meaningful earcons .....	14
9.2	Sound organization .....	14
9.3	Earcon usage .....	14
9.4	Earcon construction .....	14
9.5	Earcon duration .....	15
9.6	Consistency across earcons .....	15
9.7	Reversing earcons .....	15
10	Coding .....	15
10.1	General .....	15
10.1.1	Meaningfulness of codes .....	15
10.1.2	Access to meaning of code .....	15
10.1.3	Rules of code construction .....	15
10.1.4	Distinctiveness of codes .....	15
10.1.5	Consistent coding .....	15
10.1.6	Coding relative values .....	15
10.1.7	Ordered coding .....	16
10.1.8	Change of state .....	16
10.1.9	Combination codes .....	16
10.1.10	User training in codes .....	16
10.1.11	Counting simultaneous tones .....	16
10.2	Dimension-specific coding .....	16
10.2.1	Number of frequencies for pitch coding .....	16
10.2.2	Frequency selection for pitch coding .....	16
10.2.3	Need for redundant coding when coding based on frequency .....	16
10.2.4	Coding based on timbre .....	17
10.2.5	Coding based on intensity .....	17
10.2.6	Number of levels for loudness coding .....	17
10.2.7	Intensity spacing for loudness coding .....	17
10.2.8	Number of levels for pitch and loudness coding .....	17
10.2.9	Coding by position and distance .....	17
10.2.10	Coding position and distance with rhythm .....	17
10.2.11	Number of levels for duration coding .....	17
	Bibliography .....	18
