

ISO/TR 9241-810:2020 (E)

Ergonomics of human-system interaction — Part 810: Robotic, intelligent and autonomous systems

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Symbols and abbreviated terms
5	Report contents and structure
6	Concepts
6.1	General
6.2	IT concepts
6.2.1	Intelligent agent
6.2.2	Autonomous agent
6.2.3	Machine learning
6.2.4	Autonomous robot
6.2.5	ISO robot
6.3	Ergonomics concepts
6.3.1	Ergonomics concern for RIA systems
6.3.2	Design approaches for RIA systems
6.3.3	Perceived autonomy
6.3.4	Control loop
7	Categories of human-RIA system issues
7.1	General
7.2	RIA system — effects on a human
7.3	Human-RIA system interaction
7.4	Multiple RIA systems interacting — effects on humans
7.5	RIA system — organizational
7.6	Social/cultural/ethical
7.7	Emergent societal
8	Ergonomics and RIA systems
8.1	General
8.2	Benefits of ergonomics applied to RIA systems
8.3	Hazards if ergonomics is not applied to RIA systems
9	Areas of RIA systems addressed by ergonomics standards
9.1	General
9.2	Principles of ergonomics
9.3	Human-centred design process
9.4	Interaction and interface
9.5	Accessibility
9.6	Workspace and workload
9.7	Context and environment
10	Changes in ergonomics standards required to better address RIA system technology
10.1	General

- 10.2 Type of guidance needed and for which readerships
- 10.3 Transparent interaction and transparent users
- 10.4 Safety aspects of RIA systems

Annex A (informative) Human-RIA system issues

- A.1 General
- A.2 RIA system — effects on a human
- A.3 Human-RIA system interaction
- A.4 Multiple RIA systems interacting — effects on humans
- A.5 RIA system — organizational
- A.6 Social/cultural/ethical
- A.7 Emergent societal

Annex B (informative) Examples/case studies of ergonomics issues for RIA systems

- B.1 General
- B.2 Autonomous systems
- B.3 Automobile applications
- B.4 Industrial robotics
- B.5 First responder treatment of a casualty and transport on to hospital
- B.6 Intelligent agents and assistants for customer service
- B.7 Social networks/online activity management
- B.8 Potential conflicts in working or living environments in which accommodate both humans and RIA systems.

Annex C (informative) Development of ergonomics

- C.1 The view from the top — emergent issues for traditional ergonomics in developing RIA system
- C.2 Later steps, further development
- C.3 Safety principles

Annex D (informative) Changes required to ergonomics standards

- D.1 General
- D.2 RIA system — effects on a human
- D.2.1 General
- D.2.2 Workload
- D.2.3 Human state measurement
- D.2.4 Human models
- D.2.5 Environments
- D.2.6 Robotics — industrial safety
- D.3 Human-RIA system interaction
- D.3.1 General
- D.3.2 Who is the user?
- D.3.3 Principles of dialogue and information design
- D.4 Multiple RIA systems interacting — effect on humans
- D.5 RIA system — organizational
- D.5.1 General
- D.5.2 Human-centred organization
- D.5.3 Example — RIA systems and the ISO 11064 series
- D.5.4 Human-centred design for interactive systems
- D.6 Social/cultural/ethical
- D.6.1 General
- D.6.2 Cultural ergonomics
- D.6.3 Work system
- D.6.4 Dynamic function allocation between humans, machines?
- D.6.5 Management of emergent behaviour
- D.6.6 Value-sensitive design
- D.7 Emergent societal
- D.7.1 General
- D.7.2 Ergonomics principles and concepts

Annex E (informative) Approach followed to develop this report

- E.1 General
