

DIN EN ISO 9241-971:2024-06 (E)

Ergonomics of human-system interaction - Part 971: Accessibility of tactile/haptic interactive systems (ISO 9241-971:2020)

Contents		Page
European foreword		4
Foreword		5
Introduction		6
1	Scope	7
2	Normative references	7
3	Terms and definitions	7
4	Conformity	9
5	Physical accessibility	9
6	General requirements and recommendations	10
6.1	Compatibility with other standards	10
6.1.1	General	10
6.1.2	Hardware accessibility	10
6.1.3	Software accessibility	10
6.2	Approachability of tactile/haptic interactive systems	10
6.2.1	Size and space for approach and use of tactile/haptic interactive systems	10
6.2.2	Reachability	10
6.2.3	Reachability by remote control	11
6.2.4	Stability	11
6.3	Presentation of tactile/haptic information	11
6.3.1	Presentation of physical information	11
6.3.2	Multiple formats for presenting tactile/haptic information	11
6.3.3	Encoding of tactile/haptic information	11
6.3.4	Contextual interference with tactile/haptic presentations	12
6.4	Perceivability of tactile/haptic information	12
6.4.1	General	12
6.4.2	Discoverability of tactile/haptic components and controls	12
6.4.3	Distinction between tactile/haptic components or controls	12
6.4.4	Pausing and repeating tactile/haptic information	12
6.4.5	Speed of tactile/haptic information	13
6.4.6	Location of tactile output	13
6.5	Controllability of tactile/haptic interactions	13
6.5.1	Controllability	13
6.5.2	Support of sequential control	13
6.5.3	Physical attributes of tactile/haptic controls	13
6.5.4	Activating tactile/haptic controls	13
6.5.5	Force for activating physical controls	14
6.5.6	Continuous force for activating physical controls	14
6.5.7	Physical movements	14
6.5.8	Activating controls without hands	14
6.5.9	Activating controls with only one hand	14
6.5.10	Timing of activating physical controls	14
6.5.11	Taking breaks	15
6.6	Individualization of tactile/haptic interactions	15
6.6.1	Individualization	15
6.6.2	Individualizing tactile/haptic parameters	15
6.6.3	Identifying the current parameter values	15
6.6.4	Default parameter values	16

6.6.5	Reverting to original default parameter values	16
6.6.6	Saving modifications of parameter values	16
6.6.7	Loading saved parameter values	16
6.6.8	Changing individualized parameter values	16
6.6.9	Optimizing the number of adjustable parameters	16
6.7	Error tolerance of tactile/haptic interactions	16
6.7.1	Error tolerance	16
6.7.2	Avoiding unintentional activation of physical controls	17
6.7.3	Providing warnings on potentially dangerous actions	17
6.7.4	Ignoring harmless actions	17
6.7.5	Undoing unintended or incorrect activations	17
6.8	Tactile/haptic safety	17
6.8.1	Safety	17
6.8.2	Avoiding sensory overstimulation	18
6.8.3	Avoiding sensory overloads	18
6.8.4	Avoiding fatigue and repetitive stress injuries	18
6.8.5	Avoiding positioning and over extension injuries	18
6.8.6	Safe interaction with device	18
6.8.7	Avoiding damage to the system	19
6.9	Tactile/haptic authentication	19
6.9.1	Security and authentication	19
6.9.2	Accessible authentication	19
6.9.3	Alternatives to biometrics	19
7	Input specific requirements and recommendations	19
7.1	Keyboard specific guidance	19
7.1.1	Text as a basis for interoperability	19
7.1.2	Provision of keyboard equivalent inputs	20
7.1.3	The design of physical keys	20
7.1.4	Modifier key functions	20
7.1.5	Virtual keyboards	20
7.2	Pointing device specific guidance	20
7.2.1	Avoiding need for fine motor skills	21
7.3	Motion tracking specific guidance	21
7.4	Gesture specific guidance	21
7.4.1	Considerations for gestures	21
7.4.2	Considerations for gesture controls	21
7.5	Single-switch specific guidance	22
7.5.1	General	22
7.5.2	Single switch devices and time-dependent actions	22
7.5.3	Simultaneous multi-device input guidance	22
8	Output specific guidance	22
8.1	Vibration specific guidance	22
8.1.1	Combinations of modalities	22
8.1.2	Simultaneous multi-device output	23
8.1.3	Simultaneous multimodal output	23
8.1.4	Error	23
8.1.5	Illusion	23
8.1.6	Avoiding conflicting information	23
8.2	Masking	23
8.2.1	Temporal and spatial masking	23
8.2.2	Adaptation to saturation stimulation	24
8.3	Braille specific guidance	24
8.3.1	Considerations for tactile labels	24
8.3.2	Use of braille	24
8.3.3	Tactile cursor in braille supporting systems	24
8.3.4	Editing braille text	24
8.3.5	Refreshing braille text	25
8.3.6	Exploration of information when using braille	25
8.3.7	Evaluation of braille supporting systems	25
	Bibliography	26
