## Ergonomics of human-system interaction - Part 610: Impact of light and lighting on users of interactive systems

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Light and lighting -- more than just vision .....	4
4.1	How radiation impacts the human body .....	4
4.2	The role of light for life .....	5
4.3	Non-visual effects of radiation .....	6
4.4	A new definition of lighting .....	9
4.5	Why light is not light and daylight in interiors is different from solar light .....	9
4.6	The role of daylight and solar radiation .....	11
5	Light and circadian rhythms .....	11
5.1	Basics .....	11
5.2	Importance of light for the circadian rhythm .....	12
5.3	A new perspective on light .....	14
5.4	Relation to other zeitgebers .....	16
6	Light at night (LAN) .....	17
6.1	General .....	17
6.2	Studies of light at night (LAN or ALAN) .....	18
7	Light history (memory effect) .....	19
8	Physical characteristics .....	21
8.1	Spatial distribution of the source .....	21
8.2	Location of the source .....	21
8.3	Light spectrum and its role for vision .....	22
8.4	Light spectrum and its role for non-visual effects .....	23
8.5	Time and timing .....	24
8.6	Intensity .....	24
8.7	The role of visual displays .....	24
9	Individual differences .....	26
9.1	Chronotype .....	26
9.2	Age dependency .....	26
9.3	Internal circadian time (body time) .....	27
10	Conclusions .....	28
10.1	Agreed facts .....	28
10.2	Controversial issues .....	28
Annex A (informative)	Some useful behaviours of users or beneficial conditions for the physical environment .....	30
Bibliography .....		31
