ISO 9241-221:2023-08 (E)

Ergonomics of human-system interaction - Part 221: Human-centred design process assessment model

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms,definitionsandabbreviatedterms 2
3.1 Terms and definitions 2
3.2 Abbreviated terms 2

4 Conformity 2

5 PAMandcapabilitydetermination 3
5.1 General 3
5.2 Process capability levels and process attributes 3
5.3 Process performance indicators 4
5.4 Process capability indicators 5
5.5 Process attribute rating 5
5.6 Process capability level model 6

6 Process reference model (PRM) and process performance indicators (PPIs) (Level 1) 8
6.1 General 8
6.2 HCP.1 process group: ensure enterprise focus on human-centred quality 10
6.2.1 Purpose and outcomes of HCP.1 10
6.2.2 HCP.1.1 - Incorporate human-centred quality in business strategy 11
6.2.3 HCP.1.2 - Institutionalize human-centred quality 12
6.3 HCP.2 process group: enable human-centred design across projects and systems 13
6.3.1 Purpose and outcomes of HCP.2 13
6.3.2 HCP.2.1 - Integration of human-centred design 14
6.3.3 HCP.2.2 - Resources for human-centred design 16
6.3.4 HCP.2.3 - Authorization and control of human-centred quality 17
6.4 HCP.3 process group: execute human-centred design within a project 19
6.4.1 Purpose and outcomes of HCP.3 19
6.4.2 HCP.3.1 process sub-group: plan and manage human-centred design for the project 19
6.4.3 HCP.3.2 process sub-group: identify the context of use 27
6.4.4 HCP.3.3 process sub-group: establish the user requirements 30
6.4.5 HCP.3.4 process sub-group: design solutions that meet user requirements 36
6.4.6 HCP.3.5 process sub-group: user-centred evaluation 40
6.5 HCP.4 process group: introduction, operation and end of life of a system 45
6.5.1 Purpose and outcomes of HCP.4 45
6.5.2 HCP.4.1 - Introducing the system 46
6.5.3 HCP.4.2 - Human-centred quality in operation 48
6.5.4 HCP.4.3 - Human-centred quality during upgrades 50
6.5.5 HCP.4.4 - Human-centred quality at the end of life of a system 52

7 Processcapabilitylevelsandprocessattributes(Levels0to5) 53
7.1 General 53
7.2 Process capability level 0: Incomplete process 54
7.3 Process capability level 1: Performed process 54

7.3.1 General 54
7.3.2 PA 1.1 - Process performance process attribute 54
7.4 Process capability level 2: Managed process 54
7.4.1 General 54
7.4.2 PA 2.1 - Performance management process attribute 54
7.4.3 PA 2.2 - Documented information management process attribute 56
7.5 Process capability level 3: Established process 58
7.5.1 General 58
7.5.2 PA 3.1 - Process definition process attribute 58
7.5.3 PA 3.2 - Process deployment process attribute 59
7.5.4 PA 3.3 - Process assurance process attribute 60
7.6 Process capability level 4: Predictable process 61
7.6.1 General 61
7.6.2 PA 4.1 - Quantitative analysis process attribute 62
7.6.3 PA 4.2 - Quantitative control process attribute 63
7.7 Process capability level 5: Innovating process 64
7.7.1 General 64
7.7.2 PA 5.1 - Process innovation process attribute 64

Annex A (informative) Explanation of the process reference and PAMs 67

Annex B (informative) Conformity of the process assessment and reference models with ISO/IEC 33004 70

Annex C (informative)Attributestolookforinworkproductsaspartofanassessment 72
