

ISO 24227:2023-10 (E)

Validation protocol for walking speed as extracted from various sensor systems that measure human body motion for the healthcare sector

| Contents | Page |
|---|-------------|
| Foreword | iv |
| Introduction | v |
| 1 Scope | 1 |
| 2 Normative references | 1 |
| 3 Terms and definitions | 1 |
| 4 Validation protocol of walking speed as provided by various sensor systems | 1 |
| 4.1 General..... | 1 |
| 4.2 Qualifications of the measurer..... | 1 |
| 4.3 Sample size and participant selection for the validation study..... | 2 |
| 4.4 Validation study procedure..... | 2 |
| 4.4.1 Establishing walking distance..... | 2 |
| 4.4.2 Measurement of walking speed..... | 2 |
| 4.4.3 Comparison of measured walking speeds..... | 3 |
| 5 Validation study reporting | 3 |
| Annex A (informative) Template to report the results of a validation study | 4 |
| Annex B (informative) Sample report of the results of a validation study | 5 |
| Bibliography | 7 |
