ISO 10075-2:2024-07 (E)

Ergonomic principles related to mental workload - Part 2: Design principles

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Design principles **2**

4.1 General principles 2

4.2 Design principles in relation to work organisation 3

4.2.1 Perform system design reviews and include prospective risk assessment 3

4.2.2 Individuals' and team work-related objectives 3

4.2.3 Extended reachability 4

4.2.4 Flexibility in time allocation 4

4.2.5 Definition of work-related services 5

4.2.6 Duration of working hours 5

4.2.7 Time off between successive work days or shifts 5

4.2.8 Time of day 6

4.2.9 Shift work 7

4.2.10 Breaks and rest pauses 7

4.3 Design principles in relation to working tasks 7

4.3.1 Operating strategies 7

4.3.2 Continuous time constraints 8

4.3.3 Flexibility of decision-making 8

4.3.4 Ambiguity of task goals 9

4.3.5 Complexity of task requirements 9

4.3.6 Time sharing 10

4.3.7 Dimensionality of motor performance 10

4.3.8 Mental models 11

4.3.9 Parallel versus serial processing 11

4.3.10 Decision support 11

4.3.11 Sustained attention 12

4.4 Design principles in relation to job 12

4.4.1 Social interaction 12

4.4.2 Dependencies on others' task performance 13

4.4.3 Identical task requirements 13

4.4.4 Confidential communication 14

4.4.5 Changes in task-related activities with different demands or types of mental workload 14

4.5 Design principles in relation to work equipment and interfaces 14

4.5.1 Design the socio-technical system transparent for the user 14

4.5.2 Re-evaluate after adopting an assistance system to an existing system 15

4.5.3 Time lag 15

4.5.4 Adequacy of information 15

4.5.5 Ambiguity of information 16

4.5.6 Signal discriminability 16

4.5.7 Redundancy 16

4.5.8 Compatibility 17

4.5.9 Accuracy of information processing 18

4.5.10 Controllability 18

4.5.11 Control dynamics 18

4.5.12 Tracking requirements 19
4.5.13 Error tolerance 19
4.5.14 Adjust system design 19
4.5.15 Anticipate shifts in operating states and potential consequences 20
4.5.16 Coupling in human-machine arrangements 20
4.5.17 Adaptable and adaptive human–automation interaction 21

5 Information and training 21

Annex A (informative) **Design principles and their relation to the impairing consequences of mental strain 22**
