ISO 25553-1:2026-06 (E)

Ageing societies - Framework for smart multigenerational neighbourhoods - Part 1: Requirements and recommendations

Contents

Page

Foreword ... **viii**

Introduction ... **ix**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms, definitions and abbreviated terms ... **1**
3.1 Terms and definitions ... 1
3.2 List of abbreviated terms ... 6

4 Development of a smart multigenerational neighbourhood ... **7**
4.1 General ... 7
4.2 Diversity of human characteristics and functions to be considered within the neighbourhood ... 7
4.3 Practical design considerations for smart multigenerational neighbourhoods ... 8
4.3.1 General ... 8
4.3.2 Universal design (UD) and inclusive design (ID) ... 9
4.3.3 Integration of diverse domains ... 9
4.3.4 Supporting intergenerational active involvement ... 10
4.3.5 Design with nature ... 10
4.3.6 Flexibility and adaptability ... 10
4.3.7 Quality of life and wellbeing ... 10
4.4 Alignment with related standards ... 11

5 Multi-stakeholder collaboration models ... **11**
5.1 General ... 11
5.2 Collaborative governance ... 11
5.2.1 General ... 11
5.2.2 Economic feasibility and risk mitigation ... 12
5.2.3 Collaborative benefits ... 12
5.2.4 Adaptive approach to collaboration ... 12
5.3 Community engagement and shared responsibility ... 12
5.4 Consensus-building mechanisms ... 13
5.5 Planning for all ages ... 13
5.6 Global adaptability ... 13
5.7 Accountability framework ... 14
5.8 Implementing strategies ... 14
5.9 Relevant ISO and IEC standards ... 15

6 Social innovation ... **16**

7 Ethical governance for smart multigenerational neighbourhoods ... **17**
7.1 General ... 17
7.2 Ethical principles ... 18
7.3 Governance, stewardship and accountability ... 18
7.3.1 General ... 18
7.3.2 Public sector role ... 19
7.3.3 Ethical design and participation ... 19
7.3.4 Technology and data ethics ... 19

8 Lifelong learning and fresh perspectives ... **20**
8.1 General ... 20
8.2 Lifelong learning: mental and social benefits ... 20

8.3 Second careers and employment opportunities 21
8.3.1 General 21
8.3.2 Reskilling for second careers 21
8.3.3 Inclusive employment models 21
8.3.4 Home-based entrepreneurship 21
8.3.5 Digital literacy and access to learning platforms 22
8.3.6 Access to e-learning platforms 22
8.3.7 Fostering intergenerational learning and community engagement 22
8.3.8 Community participation and active involvement 22

9 Building sustainable neighbourhoods: services, governance and investment 23
9.1 General 23
9.2 Bridging the financial gap 23
9.3 Encouraging innovation and investment 23
9.4 Sustainable business models 24
9.5 Innovative financial instruments 24
9.6 Digital platforms for neighbourhood management 24

10 Design for life 25
10.1 General 25
10.2 Structured co-creation process for inclusive design 25
10.3 Community goals and metrics definition 25
10.4 Assessment of smart technologies 26
10.5 Adaptability for diverse contexts 26
10.6 Leveraging compatible standards and guidelines 27

11 Planning and design 27
11.1 General 27
11.2 Collaborative and inclusive planning process 28
11.3 Collective decision-making 28
11.4 Participatory planning and integrated neighbourhood development 28
11.5 Leveraging compatible standards and guidelines 29

12 Planning and placemaking 29
12.1 General 29
12.2 Consistent planning definitions and categories 29
12.3 Community needs assessments 30
12.4 Integrated public spaces and services 30
12.5 Site allocation for diverse housing and infrastructure 30
12.6 Streamlined planning processes 31
12.7 Training and capacity building 31
12.8 Incentives, innovation and shared learning ecosystems 31
12.9 Local plan integration 32
12.10 Monitoring and assessment 32
12.11 Alignment with compatible standards and guidelines 33

13 Regeneration for smart multigenerational neighbourhoods 33

14 Creating inclusive public spaces for connection and community 34
14.1 Overview 34
14.2 Walkability 34
14.2.1 General 34
14.2.2 Third places 35
14.2.3 Greening: definition and importance 35
14.2.4 Blue spaces: definition and importance 36
14.2.5 Space making: empowering residents to shape their environment 36
14.2.6 Public art: enriching neighbourhood life through cultural expression 36

15 Key neighbourhood and dwelling design considerations 37
15.1 Respecting and enhancing existing context 37
15.2 Safety and security 38
15.3 Built environment 38
15.4 Mixed-use integration 39
15.5 Design requirements and recommendations for housing 40
15.5.1 General 40
15.5.2 New multigenerational living arrangements 40
15.5.3 Multigenerational community design 41
15.5.4 Dwellings: mix 42

15.5.5 Dwellings: universal and inclusive design ... 43
15.5.6 Accessible and adaptable housing design principles ... 44
15.6 Hybrid and inclusive supported neighbourhood living ... 45
15.7 Design considerations for vertical neighbourhoods ... 45
15.7.1 General ... 45
15.7.2 Mobility, accessibility and safety in vertical neighbourhoods ... 46
15.7.3 Green spaces and mental wellbeing in high-density settings ... 46
15.7.4 Mental wellbeing, crowding and privacy in vertical environments ... 46
15.7.5 Social connection, security and emergency preparedness ... 47
15.7.6 Cognitive, cultural, and spiritual inclusion ... 47
15.8 Specialist housing ... 47
15.8.1 General ... 47
15.8.2 Provision, integration and neighbourhood connection ... 47
15.8.3 Specialist housing design – placemaking, adaptability, and wellbeing ... 48

16 Retrofitting and remodelling towards smart multigenerational neighbourhoods ... 49

17 Design for resilience ... 51
17.1 General ... 51
17.2 Operationalisation of resilience ... 51
17.3 Climate resilience for ageing populations ... 52

18 Digital infrastructure as the foundation for smart multigenerational neighbourhoods ... 52
18.1 General ... 52
18.2 Establishing digital plumbing ... 53
18.3 Digital plumbing in practice ... 54
18.4 Moving beyond connectivity: towards cognitive neighbourhoods ... 54

19 Secure, inclusive and sustainable digital ecosystems ... 55

20 Smart infrastructure as a foundation for cognitive health and care services ... 57
20.1 General ... 57
20.2 Designing for cognitive health and care services ... 57
20.3 Cognitive neighbourhood infrastructure ... 58
20.3.1 Digital hubs and cognitive systems ... 58
20.3.2 Seamless community connectivity ... 58
20.3.3 Robotic systems for health and social support ... 58
20.3.4 Data integration and interoperability ... 59
20.3.5 Public health as an active entity ... 59
20.3.6 Intelligent energy systems for cognitive neighbourhoods ... 59
20.4 In-home and personal technologies in cognitive contexts ... 60
20.4.1 General ... 60
20.4.2 AI-driven health monitoring ... 60
20.4.3 Robotics and ambient intelligence ... 61
20.4.4 Home automation for wellbeing ... 61
20.5 Wearable health technologies in cognitive contexts ... 62
20.5.1 General ... 62
20.5.2 AI-enabled wearables and predictive insights ... 62
20.5.3 Wearable robotics for enhanced mobility ... 62
20.6 Data flow, cognitive analysis and management ... 62
20.6.1 General ... 62
20.6.2 Data exchange for cognitive processing ... 63
20.6.3 Privacy, security, and ethical AI standards ... 63
20.7 Ensuring a future-ready, cognitive environment ... 63
20.7.1 General ... 63
20.7.2 Scalable and adaptable cognitive infrastructure ... 63
20.7.3 Continuous learning and feedback integration ... 64
20.7.4 Active stakeholder involvement ... 64
20.8 Requirements in other standards ... 64

21 Decentralising neighbourhood-based health and social care ... 64
21.1 General ... 64

21.2 Empowering social care: a blueprint for a digital age ... 65
21.3 Key principles for empowering social care in the digital age ... 65
21.3.1 Community-centric approach ... 65
21.3.2 Inclusivity and accessibility ... 66
21.3.3 Integrated systems for community wellbeing ... 66
21.3.4 Public health as a shared resource ... 67
21.3.5 Focus on preventative measures ... 67
21.3.6 Digital empowerment for care providers ... 67
21.3.7 Person-centred care for all ages and abilities ... 67
21.3.8 Ethics, privacy and trust ... 68
21.3.9 Collaborative community involvement ... 68
21.3.10 Collaborative models for risk-sharing and sustainability ... 68
21.3.11 Telecare and telehealth in context ... 69
21.4 Decentralised medical procedures and community-based care ... 69
21.4.1 General ... 69
21.4.2 Virtual wards ... 69
21.4.3 Neighbourhood-based health and wellbeing hubs ... 70
21.5 Neighbourhood-based care environments ... 71
21.5.1 General ... 71
21.5.2 Neighbourhood-embedded care environments ... 72
21.5.3 Adaptive and connected living settings ... 72
21.5.4 Optimising existing assets for sustainable transformation ... 73
21.5.5 Neighbourhood health centres: Integrated community hubs ... 74
21.5.6 Community empowerment and social participation ... 74
21.5.7 Digitally enabled, localised care ... 75
21.5.8 Accessibility and inclusivity ... 76
21.5.9 Preventative and population health focus ... 76
21.5.10 Community-driven design and flexibility ... 77
21.6 Dementia-inclusive environments ... 77
21.7 Redefining palliative care in the community ... 78
21.7.1 General ... 78
21.7.2 Designing for dignity and comfort ... 79
21.7.3 Technology-enabled, person-centred support ... 79
21.7.4 Engaging families, caregivers and the community ... 80
21.7.5 Normalising end-of-life as part of life ... 80

22 Reframing mobility for all ... 81
22.1 General ... 81
22.2 Designing inclusive mobility ecosystems ... 82
22.3 Digital and intelligent mobility infrastructure ... 82
22.4 Community co-creation and evaluation ... 83
22.5 Empowering micromobility ... 84
22.6 Foundational mobility infrastructure ... 85
22.7 Accessible parking and drop-off zones ... 85
22.8 Mobility for independence and social connection ... 86
22.9 Sustainable and environmentally responsible mobility ... 86
22.10 Safety and road design ... 87
22.11 Participatory monitoring of mobility safety and usability ... 87

23 Bridging generations: a blueprint for shared learning ... 88
23.1 General ... 88
23.2 Childcare and community learning settings ... 88
23.3 Youth engagement and intergenerational connection ... 89
23.4 Intergenerational shared spaces and programmes ... 89

24 SMNs: cultivating neighbourhoods that care – for life ... 90
24.1 General ... 90
24.2 Neighbourhoods built for strength, shaped to adapt ... 90
24.3 Cognitive housing and disruptive models of care ... 90
24.4 Neighbourhood-powered innovation ... 91
24.5 Investing in places people believe in ... 91
24.6 Enabling continuity of living ... 91

Bibliography ... 92
