DIN EN ISO 14915-3:2003-04 (E)

Software ergonomics for multimedia user interfaces - Part 3: Media selection and combination (ISO 14915-3:2002)

Contents

Page

Foreword ... 2

Introduction ... 4

1 Scope ... 5

2 Normative references ... 5

3 Terms and definitions ... 6

4 Application of this part of ISO 14915 ... 10
4.1 Intended user groups ... 10
4.2 Applying the recommendations ... 10
4.3 Reporting conformance to this part of ISO 14915 ... 10

5 General guidelines for media selection and combination ... 10
5.1 General ... 10
5.2 Supporting user tasks ... 10
5.3 Supporting communication goals ... 11
5.4 Ensuring compatibility with the users' understanding ... 11
5.5 Selecting media appropriate for the users' characteristics ... 11
5.6 Supporting users' preferences ... 11
5.7 Considering the context of use ... 11
5.8 Using redundancy for critical information ... 12
5.9 Avoiding conflicting perceptual channels ... 12
5.10 Avoiding semantic conflicts ... 12
5.11 Designing for simplicity ... 12
5.12 Combining media for different viewpoints ... 12
5.13 Choosing media combinations to elaborate information ... 12
5.14 Guarding against degradation ... 13
5.15 Previewing media selections ... 13
5.16 Using static media for important messages ... 13

6 Media selection for information types ... 13
6.1 General ... 13
6.2 Consider information types ... 15
6.3 Consider multiple-information types ... 15
6.4 Selecting and combining media ... 15
6.4.1 Physical information ... 15
6.4.2 Conceptual information ... 15
6.4.3 Descriptive information ... 15
6.4.4 Spatial information ... 15
6.4.5 Value information ... 16
6.4.6 Relationship information ... 16
6.4.7 Discrete action information ... 16
6.4.8 Continuous action information ... 16
6.4.9 Event information ... 16
6.4.10 State information ... 16
6.4.11 Causal information ... 17
6.4.12 Procedural information ... 17

7 Media integration ... 17
7.1 General ... 17
7.2 Design issues ... 17
7.3 Media integration guidelines ... 17
7.3.1 General ... 17

7.3.2 Advance organizers 18
7.3.3 Synchronized, related media 18
7.3.4 Separating audio content sources 18
7.3.5 Avoiding interference in audio media 18
7.3.6 Limiting speech interruptions in audio and language-based media 18
7.3.7 Integrating non-realistic images with realistic images 18
7.3.8 Use of captions with images 18

8 Directing users' attention 19
8.1 General 19
8.2 Direct-contact points for key thematic links 19
8.3 Direct-contact points for linked components 19
8.4 Indirect-contact points 20
8.5 Sequence of contact points to connect a thread of topics 20
8.6 Guidelines for contact points between media pairs 20
8.6.1 General 20
8.6.2 Source medium: realistic audio 22
8.6.3 Source medium: non-realistic audio 22
8.6.4 Source medium: speech 23
8.6.5 Source medium: still image 24
8.6.6 Source medium: text 25
8.6.7 Source medium: moving image 26

Annex A (informative) **Decision trees for classification of types** 27

Annex B (informative) **Guidelines for media-combination pairs** 31

Annex C (informative) **Examples of media-combination patterns** 41

Annex D (informative) **Design issues and cognitive background** 43
