

# ISO 14097:2021 (E)

## Greenhouse gas management and related activities — Framework including principles and requirements for assessing and reporting investments and financing activities related to climate change

---

### Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Principles
4.1	General
4.2	Description of principles
4.2.1	Relevance
4.2.2	Consistency
4.2.3	Completeness
4.2.4	Conservativeness
4.2.5	Long-term orientation
4.2.6	Transparency
4.2.7	Verifiability
4.2.8	Accuracy
4.2.9	Synergy
4.2.10	Coherence
4.2.11	Ability to influence
4.2.12	Effectiveness
4.2.13	Evidence-based
4.2.14	Goal-oriented
4.2.15	Additionality-based
5	Framework for disclosing a financier's climate change risks and opportunities
5.1	General
5.2	Financier's business strategy and financial planning over the short, medium and long term
5.2.1	Identification of climate change risks and opportunities over the short, medium and long term
5.2.2	Financiers' governance of climate change risks and opportunities
5.2.3	Influence of climate change risks on financier's business and strategy
5.2.4	Investees' climate change risks and opportunities
5.3	Targets related to climate change risks and opportunities
5.4	Managing climate change risks
5.5	Metrics and methodologies used over the short, medium and long term
6	Framework for assessing, monitoring and reporting the impact of a financier's climate action on climate goals
6.1	General
6.2	Climate strategy and policy
6.3	Climate action planning and documentation
6.3.1	General
6.3.2	Defining attributes of the climate action taken
6.3.3	Defining the climate action
6.3.4	Expected outputs of the climate action
6.3.5	Expected outcomes of the climate action

- 6.3.5.1 General
- 6.3.5.2 Outcomes related to climate change mitigation
- 6.3.5.3 Outcomes related to climate change adaptation
- 6.3.5.4 Outcomes related to multiple periods of time
- 6.3.6 Expected impact of the climate action
- 6.4 Monitoring of the climate action and respective outputs, outcomes and impacts
- 6.4.1 Monitoring plan
- 6.4.2 Documentation of expected outputs, outcomes and impacts
- 6.5 Assessment of the impact of the financier's climate action
- 6.6 Reporting on the financier's climate action(s)
- 6.6.1 General
- 6.6.2 Required information
- 6.6.2.1 Financier's general information
- 6.6.2.2 Climate strategy
- 6.6.2.3 Climate action
- 6.6.2.4 Output of the climate action
- 6.6.2.5 Outcome of the climate action
- 6.6.2.6 Climate impact of the investee
- 6.6.2.7 Actual impact of the financier's climate action
- 6.7 Recommended information
- 6.7.1 General
- 6.7.2 Defining the climate action
- 6.7.3 Expected output of the climate action
- 6.7.4 Expected outcome of the climate action
- 6.7.5 Expected impact of the investee's actions on the achievement of the climate goals
- 7 Assessing and reporting the GHG emissions associated with the actions of the financier without climate objectives
- 8 Document retention and record-keeping
- 9 Verification and validation
- Annex A (informative) Flow chart of the relationship between Clauses 6 and 7
- Annex B (informative) Indicative list of actions for the financier
- Annex C (informative) Guidance on the selection of scenarios
  - C.1 General
  - C.2 Ambition
  - C.3 Speed
  - C.4 Boundaries
  - C.5 Granularity
  - C.6 Parameters
  - C.7 Time-horizon
  - C.8 Assumptions
- Annex D (informative) Guidance on outcome and emissions trajectory quantification
  - D.1 Quantifying the baseline emissions trajectory
  - D.2 Quantifying the science-based outcome and emissions trajectory
    - D.2.1 General
    - D.2.2 Science-based outcome trajectory for sectors in which mitigation scenarios projecting a technology shift from high-carbon to low-carbon exist
    - D.2.3 Science-based outcome trajectory for sectors in which mitigation scenarios projecting a technology shift from high-carbon to low-carbon do not exist
    - D.2.4 Science-based emissions trajectory
  - D.3 Quantifying the investee's trajectory with climate action
  - D.4 Quantifying the investee's impact
- Annex E (informative) Examples of opportunities, positive impact and sectoral activities associated with climate action
  - E.1 General
  - E.2 Examples of opportunities and positive impacts resulting from climate action

- E.2.1** Investing in low-carbon and climate resilience development in the short, medium and long term
- E.2.2** Investing in transition pathways
- E.2.3** Investing in low-carbon and resilient products and services
- E.2.4** Investing in changes in energy sources, waste reduction and reuse for resource efficiency toward a circular economy
- E.2.5** Investing in the development of new innovative technology and its transfer
- E.3** Sectoral activities
